WP11 Wide bend to the left, follow road downhill 220metres

WP12 Steep bend down to the right, follow road downhill 300metres

WP13 Road crosses stream then through gateway. Follow forest road downhill 330metres

WP02 again. Retrace your steps 300metres through trees back to the start at WP01.

## WARDEN'S WALK Colden

This is a walk of 4.3 kilometres, about 2.7 miles, Approx. before taking the forest road up into its higher reaches at an altitude of 1000ft.

During the climb, the forest road begins to follow the route of the old 'Governor Loch's Road'; a 19th Century, wellconstructed track, which was never formerly completed due to a landowners' dispute. A stone way- marker, to the side of the road, signifies its beginning at the southern end of its course. (Its northern end is nearly 5 kilometres away at its junction with the Brandywell Road.)

At the upper edge of the plantation the walk continues along this old public road and out onto open hill land. Walkers will be grateful for the sections of boardwalk Footpath's Task Force in 2010.

Colden forms part of the Greeba Mountain & Central the largest of the Island's ASSIs and extends to 1,080 hectares (2,671 acres). It was designated in 2008 for hen harrier, raven, curlew, stonechat and snipe, and its upland wildlife habitats - notably heather moorland, acid grassland, blanket bog and acid hillside flushes.

hills beyond. The route then passes over a stile before descending to another forest road, which returns the walker once more to the lower parts of the plantation and eventually back to the starting point.

Although the going is generally good, there are wet waterproof footwear. The route is way-marked on the

## WARDEN'S WALK

No.13 in a series of walks in the Manx countryside, created by the Island's Forestry Warden
