Reporting data source: Medway SQL database

Reporting key:

**Total live referrals** - The total number of referrals that are active (not closed) under each specialty

**Total waiting for 1st appointment** - The total number of referrals where the patient has not yet been seen or given an appointment date to be seen

**Booked 1st appointment** - The number of referrals where the patient has not yet been seen but has an appointment booked for a future date (combined with the "Total waiting for 1st appointment" shows the actual number of referrals waiting to be seen for their 1st appointment)

**AVG time waiting for 1st appointment total (days)** - Of the number of patients waiting (combined as above) on average how long have they been waiting (Calculation totalling the number of days waiting divided by the number of referrals waiting for a 1st appointment)

**MAX time waiting for 1st appointment total (days)** - Of the number of patients waiting (combined as above) the maximum number of days that a referral has been waiting for their 1st appointment

**AVG for 2 Week wait / Urgent / Routine** - These are the same as Total average but just including the referrals that are 2WW / Urgent / Routine in the calculations
