LITERATURE SEARCHING USING THE TRIP DATABASE

The Trip Database is available at **https://www.tripdatabase.com/** and is a clinical search engine designed to allow users to quickly and easily find and use high-quality research evidence to support their practice and/or care.

Trip includes:

- Research Evidence
- Images
- Videos
- Patient Information Leaflets
- Educational Courses
- News

Information on the database is sourced from thousands of areas from NICE Guidelines, and the Cochrane Database, to textbooks. There are millions of documents available on the site.

Finding Information – Basic Searching

Access to Trip's Basic Search and PICO search functions is free of charge. The search bar is available directly from the home page.

Select either search, or PICO and enter your search term(s).

Trip's search bar is predictive and will offer options to complete the word you are searching for:

Searches are returned with an indication of how many results there are, search suggestions for narrowing down your topic, and on the right of each result is an indication of what type of information it is
