23 January 2017  
Pages 1

## **The Aircraft Registry Digital Information System (ARDIS)**

### **Customer Access to Online Services Portal**

The Isle of Man Aircraft Registry online services portal first became available to the public in April 2016. Since then, over 100 online mortgage searches have been processed, around 15 new registration marks reserved, and the live (real-time) Aircraft Register has been accessed by both customers and other interested parties alike.

During the week commencing 30 January 2017, the Aircraft Registry will introduce an extension to its' online services portal which will provide customers with login access to information held on record to assist in the management of aircraft on the Isle of Man Aircraft Register.

Registered owners of Isle of Man registered aircraft will receive an invitation by e-mail to complete creation of their account.

Please take advantage of the invitation within the time frame indicated in the notification if you wish to have access to this service.

Once logged into the site, owners may offer access to other individuals who are connected with the operation of M registered aircraft under their management by adding them via their account. Guidance on all aspects of the portal will be circulated to existing customers prior to introduction of the service.

**Please note that access to the site does not constitute authorisation to act, it is only a facility to view information.**

Operators, Flight Operations Representatives (FORs) and Nominated Airworthiness Technical Representatives (NATRs) may benefit greatly from access to the system and have specifically been provided for in the development of the site.

The new features will enable customers of the Isle of Man Aircraft Registry to view aircraft data, download certain certificates relating to aircraft they manage, and have the ability to view a list of certificates coming up for renewal.
