

Introduction to Searching with EBSCO

A Keyll Darree Library Guide

What is EBSCO?

EBSCO is a research platform, or, more simply, a way to search different databases in one go.

With Keyll Darree Library you can use it to access CINAHL (nursing and allied health database), MEDLINE (medical information), Psychology and Behavioural Sciences Collection (mental health), Health Business Elite (non-clinical admin and hospital management), Biomedical Reference Collection (for doctors, research scientists, students, clinical specialists, and managers), and Teacher Reference Centre (resources for professional educators).

Can everyone access it?

No, only people with an Athens login are able to use this resource. Athens logins allow users to access to online journals, books, and other resources, and are available to DHSC employees and affiliated partners who are members of Keyll Darree Library.

CINAHL with Full Text

CINAHL® with Full Text is the world's most comprehensive source of full text for nursing & allied health journals, providing full text for more than 610 journals indexed in CINAHL®. This authoritative file contains full text for many of the most used journals in the CINAHL index - with no embargo. Full-text coverage dates back to 1981.

[Title List](#) [More Information](#)

MEDLINE Complete

MEDLINE Complete provides authoritative medical information on medicine, nursing, dentistry, veterinary medicine, the health care system, pre-clinical sciences, and much more. MEDLINE Complete uses MeSH (Medical Subject Headings) indexing with tree, tree hierarchy, subheadings and explosion capabilities to search citations from over 5,400 current biomedical journals. MEDLINE Complete is also the world's most comprehensive source of full text for medical journals, providing full text for over 1,800 journals indexed in MEDLINE. Of those, more than 1,700 have cover-to-cover indexing in MEDLINE, and of those, over 900 are not found with full text in any version of Academic Search, Health Source or Biomedical Reference Collection. This wide-ranging file contains full text for many of the most used journals in the MEDLINE index - with no embargo. With coverage dating back to 1857 and full-text back to 1865, MEDLINE Complete is the definitive research tool for medical literature.

[Title List](#) [More Information](#)

Tip: Select as many as you want! If there are no results for your search on the database then it won't impact your search, but if you cast your net wider than usual you might be surprised by the results.

Basic Searches

Enter your search terms in the search boxes – Boolean is built in on Ebsco, so you can add in words as “AND” terms automatically, or choose to switch them to “OR” or “NOT” (Never used Boolean before? Check out this [visual explanation](#))

The screenshot shows the Ebsco search interface. At the top, there are navigation links: New Search, Subjects, Publications, Images, More, Sign In, Folder, Preferences, Languages, Ask-A-Librarian, and Help. The search bar contains the text 'Handwashing' and 'AND Cross infection'. There are three search boxes, each with a 'Select a Field (optional)' dropdown and a 'Search' button. Below the search bar, there are options for 'Basic Search', 'Advanced Search', and 'Search History'. The 'Search Options' section includes 'Search Modes and Expanders' with radio buttons for 'Boolean/Phrase', 'Find all my search terms', 'Find any of my search terms', and 'SmartText Searching'. There are also checkboxes for 'Apply related words', 'Also search within the full text of the articles', and 'Apply equivalent subjects'. The 'Limit your results' section includes checkboxes for 'Full Text', 'Publication', 'Published Date' (with month and year dropdowns), 'Peer Reviewed', and 'Image Quick View'.

Tip: natural language searching is fine, but you don’t need to include connecting words – pick out the key bits of your query, don’t paste in an entire question. (Try “hand washing hospital cross infection” instead of “does hand washing help to limit staff transmitted infections in the hospital?”)

When you run the search you’ll be able to see how many results you’ve received.

The screenshot shows the search results page. On the left, there is a 'Refine Results' sidebar with 'Current Search' showing 'Boolean/Phrase: hand washing AND cross infection' and 'Expanders' with 'Apply equivalent subjects'. The 'Limit To' section includes checkboxes for 'Full Text', 'Peer Reviewed', and 'Image Quick View', and a date range from 1964 to 2019. The main results area shows 'Search Results: 1 - 50 of 6,046'. There are two results listed, each with a title, a document icon, and a magnifying glass icon. Result 1 is 'Factors Affecting Hand Hygiene Adherence at a Private Hospital in Turkey.' and result 2 is 'Demonstrating the persistent antibacterial efficacy of a hand sanitizer containing benzalkonium chloride on human skin at 1, 2, and 4 hours after application.' Both results include a short abstract, journal information, and subject terms. There are also links for 'Check for Full Text' and 'PlumX Metrics' for each result.

Each result will have a clickable title which will take you to the abstract so you can read more about the paper.

Tip: Hover over the paper and magnifying class icon to see a short abstract without leaving the results page.

This will add the new term to the previous search, instead of requiring you to re-run the previous search with the new addition.

Storing Useful Results

Each result has a folder icon beside it

1. [Efficacy of observational hand hygiene audit with targeted feedback on doctors' hand hygiene compliance: A retrospective time series analysis.](#)  

Academic Journal

(includes abstract) Smiddy, Maura P; Murphy, Olive M; Savage, Eileen; Fitzgerald, Anthony P; O' Sullivan, Brenda; Murphy, Catriona; Bernard, Margaret; Browne, John P; Journal of **Infection** Prevention, Jul2019; 20(4): 164-170. 7p. (Article) ISSN: 1757-1774, Database: CINAHL with Full Text

Subjects: Handwashing; Feedback; Professional Compliance Evaluation; Consultants; **Cross Infection** Prevention and Control

[Check for Full Text](#)  [PlumX Metrics](#)

2. [Hand hygiene expectations in radiography: A critical evaluation of the opportunities for and barriers to compliance.](#)  

Academic Journal

(includes abstract) Jeanes, Annette; Henderson, Fiona; Drey, Nick; Gould, Dinah; Journal of **Infection** Prevention, May2019; 20(3): 122-131. 10p. (Article) ISSN: 1757-1774, Database: CINAHL with Full Text

Subjects: Radiology Service; **Infection** Control Standards; **Handwashing**; Professional Compliance; Quality Improvement

Clicking this folder will add the resource to your personal folder and turn the icon golden.

1. [Efficacy of observational hand hygiene audit with targeted feedback on doctors' hand hygiene compliance: A retrospective time series analysis.](#)  

(includes abstract) Smiddy, Maura P; Murphy, Olive M; Savage, Eileen; Fitzgerald, Anthony P; O' Sullivan, Brenda; Murphy, Catriona; Bernard, Margaret; Browne, John P; Journal of **Infection** Prevention, Jul2019; 20(4): 164-170. 7p. (Article) ISSN: 1757-1774, Database: CINAHL with Full Text

These articles will be stored in your personal folder until you log out of EBSCO. At the end of your search, once you're happy with your results, select the Folder icon on the blue ribbon. 

The screenshot shows the top navigation bar of the EBSCO search interface. It includes links for 'New Search', 'Subjects', 'Publications', 'Images', and 'More'. On the right side, there are links for 'Sign In', 'Folder' (with a folder icon), and 'Preferences'. Below the navigation bar, the search bar area is visible, showing the text 'Searching: CINAHL with Full Text, Show all | Choose Databases'. There is a search input field, a dropdown menu labeled 'Select a Field (optional)', and a green 'Search' button.

You can then reassess your selected resources, deleting any that are no longer relevant, and choosing how to save the ones you do want to retain.

Found this useful? Think we need to change something? Please spare 2 minutes to fill out our [Online Training Feedback Survey](#)

The screenshot shows the EBSCOhost interface for a folder of articles. On the left is a navigation menu with categories like Articles (7), Images (0), Videos (0), etc. The main area is titled 'Articles' and shows '1-7 of 7' items. The first article is selected and displayed in a light blue box. The article title is '1. Efficacy of observational hand hygiene audit with targeted feedback on doctors' hand hygiene compliance: A retrospective time series analysis.' Below the title is a small icon of a journal and the text 'Academic Journal'. The article details include authors (Smiddy, Maura P.; Murphy, Olive M.; Savage, Eileen; Fitzgerald, Anthony P.; O' Sullivan, Brenda; Murphy, Catriona; Bernard, Margaret; Browne, John P.), the journal name (Journal of Infection Prevention, Jul2019; 20(4): 164-170. 7p.), and the database (CINAHL with Full Text). The subjects listed are Handwashing; Feedback; Professional Compliance Evaluation; Consultants; and Cross Infection Prevention and Control. A 'Check for Full Text' link is at the bottom of the article box. On the right side of the interface, there are several action icons: Print, E-mail, Save as File, and Export. A blue arrow points from the 'Export' icon towards the article box.

EBSCO allows references to be printed, emailed to an address of your specification, saved as a file, or exported to Refworks or other referencing software.
