River Catch Return Form 2022

Please complete in BLOCK CAPITALS and black ink.

Licence No.

If you fished for **Brown Trout**, **Salmon** or **Sea Trout** on the Isle of Man in 2022, please help us to collect information on Manx fish stocks by returning your catch return at the end of the season or by 31 January 2023 at the latest.

Date fished	River (and area if possible) (e.g. Sulby - Claddagh)	Species (SA, ST, BT, or NC for nil catch)	Size (length or weight)		Method (e.g. fly, spin etc.)	Released (✓)
			Length (cm)	Weight (lbs/ozs)		

Angler catch returns provide important information on the status of the Island's fish stocks. The statistics will be used to ensure our resources are directed most effectively towards the enhancement and development of Manx Salmon and Sea Trout stocks.

Please return this form by **31 January 2023** to:

Fisheries Directorate
Dept. Environment, Food and Agriculture,
The Slieau Whallian, Foxdale road,
St Johns.
Isle of Man
IM4 3AS

or by email: fisheries@gov.im

Please note:

Even if you have not managed to catch any fish, it is still useful for us to know which rivers you have fished.

Length of fish should be measured from tip of snout to middle of tail fork. The priority is for information on fish of takeable size, but information on smaller fish is welcomed.
