Criminal Justice Digital Priorities

Digital Principles

Thinking Digitally	Maximise Agency Efficiency	Each part of the Criminal Justice Service should make best use of technology and digital systems to maximise their own areas, driving efficiency and speedier justice.	Paperless	To remove paper from the whole process by end of 2018
Working Together	Improve Service Interactions	Where agencies interact, this should be conducted digitally – removing delay, increasing accuracy and preserving an evidence trail.	Common Identifier	To have a common identifier through all the services - a golden thread, minimising duplication, supporting accuracy & enabling insights
Learning Intelligently	Harness Intelligence	Each agency and the service as a whole should maximise the use of digital information to understand process performance, offender and victim outcomes and monitor progress towards overall CJS strategy goals.	One Offender One Record	Using the identifier to link systems and show a true and accurate case view of any one involved in the service at any point.

Built on Digital Foundations – owned by CJS Board

Digital Justice

Building on paperless within agencies, remove paper from court processes, consolidate around **digital case files** and support **digital evidence** throughout process.

Mobile Justice

Support digital working and speedy justice through expanded **WiFi** facilities across the physical spaces and developing **mobile** solutions to maximise front line services.

Virtual Justice

Common **secure workspace** to support agency interactions & integrated **audio / video solutions** providing a simple secure virtual experience

Informed Justice

Define and publish **information strategies** – moving to presumption of sharing x-agency and outside CJS where appropriate & Deliver **integrated Pathways** through review and enablers.

And Digital Journeys – owned by each agency
