The Merchant Shipping (MARPOL Annex VI – Prevention of Air Pollution) Order 2014 (SD ###/2014) implements Annex VI of MARPOL 73/78 - Regulations for the Prevention of Air Pollution from Ships and this Notice should be read with that Order.

This Notice provides information on the requirements for Isle of Man Fuel Oil Suppliers to comply with the requirements of the Order.

Documents referred to in this notice:
The Merchant Shipping (MARPOL Annex VI – Prevention of Air Pollution) Order 2014 (“the Order”)
MARPOL Annex VI - Regulations for the Prevention of Air Pollution from Ships (“Annex VI”)
Most regulations and notices are available on the Isle of Man Government web site: www.iomshipregistry.com or by contacting marine.survey@gov.im

1. Preamble

1.1. Pollution from ships is regulated through the International Convention for the Prevention of Pollution from Ships (MARPOL).

1.2. This includes, in MARPOL Annex VI, regulations to prevent air pollution from ships, in addition to regulating ships Annex VI also requires each country to impose certain requirements on suppliers of fuel oil to ships.

1.3. In the Isle of Man these requirements apply to ‘local suppliers of fuel oil’, with a ‘local supplier of fuel oil’ defined as a person who receives fuel oil with a view to its delivery to and use on board a ship whilst it is in the Island or the territorial waters of the Island by barge or direct from shore.

1.4. For the purpose of these requirements a ship is defined as being a vessel of any type operating in the marine environment.

1.5. The requirements are contained within the Order and are outlined in this notice for ease of reference.

Responsibilities of a local supplier of fuel oil.

2. Registration

2.1. A local supplier of fuel oil who delivers fuel oil to a ship for combustion purposes must register with the Department annually.

2.2. This is not a new requirement, however, the actual provisions of that registration have been changed slightly and from the date of issue of this notice a local supplier of fuel oil must register with the Department on the 1st April each year ensuring that
the registration is received by the Department within a month either side of that date.

2.3. Registration should be submitted to the Department on form Q011 a copy of which is attached to this Notice.

3. **Bunker delivery note**

3.1. A local supplier of fuel oil who supplies fuel to a vessel which is of 400 gross tonnes or above, or any fixed and floating platform or drilling rig, which has an International Air Pollution Prevention Certificate must provide the vessel with a bunker delivery note relevant to that fuel.

3.2. The bunker delivery note must contain the following information:

   3.2.1. name and IMO number of the receiving vessel;
   3.2.2. the Port of delivery;
   3.2.3. the date of commencement of delivery;
   3.2.4. local fuel oil suppliers name and address;
   3.2.5. the name of the product;
   3.2.6. the quantity of product delivered in metric tonnes;
   3.2.7. the density of the product in kg/m³ measured at 15°C;
   3.2.8. the sulphur content of the product in %m/m; and
   3.2.9. be certified by the fuel oil suppliers representative that the fuel oil complies with the requirements of Annex VI.

3.3. A copy of the bunker delivery note must be retained by the local fuel oil supplier for a period of three years from the date of delivery and is to be made available for inspection purposes.

3.4. The Bunker delivery note is to be accompanied by a representative sample of the fuel oil delivered.

4. **Representative Sample**

4.1. The representative sample of the fuel oil should be collected in accordance with the following guidelines:

   4.1.1. A primary sample of the fuel delivered to the ship should be obtained by one of the following methods at the time of delivery:
   - manual valve-setting continuous-drip sampler; or
   - time-proportional automatic sampler; or
   - flow-proportional automatic sampler.

   4.1.2. Sampling equipment should be used in accordance with manufacturer's instructions, or guidelines, as appropriate.

   4.1.3. A means should be provided to seal the sampling equipment throughout the period of supply.
4.1.4. Attention should be given to:
- the form of set up of the sampler;
- the form of the primary sample container;
- the cleanliness and dryness of the sampler and the primary sample container prior to use;
- the setting of the means used to control the flow to the primary sample container; and
- the method to be used to secure the sample from tampering or contamination during the bunker operation.

4.1.5. The primary sample receiving container should be attached to the sampling equipment and sealed so as to prevent tampering or contamination of the sample throughout the bunker delivery period.

4.1.6. The sample of the fuel delivered to the ship should be obtained at the receiving ship’s inlet bunker manifold and should be drawn continuously throughout the bunker delivery period.

4.2. A retained fuel sample is then to be taken from the primary sample and is to be provided to the ship at the end of the delivery period and should be provided in line with the following guideline:

4.2.1. The retained sample container should be clean and dry;
4.2.2. Immediately prior to filling the retained sample container, the primary sample quantity should be thoroughly agitated to ensure that it is homogeneous;
4.2.3. The retained sample should be of sufficient quantity to perform the tests required but should not be less than 400 ml. The container should be filled to 90% ± 5% capacity and sealed; and
4.2.4. Immediately following collection of the retained sample, a tamper proof security seal with a unique means of identification should be installed by the local fuel oil supplier’s representative in the presence of the ship’s representative.

4.3. A label containing the following information should be secured to the retained sample container:

4.3.1. location at which, and the method by which, the sample was drawn;
4.3.2. date of commencement of delivery;
4.3.3. name of bunker tanker/bunker installation;
4.3.4. name and IMO number of the receiving ship;
4.3.5. signatures and names of the supplier’s representative and the ship’s representative;
4.3.6. details of seal identification; and
4.3.7. bunker grade.
4.4. To facilitate cross-referencing the details of the seal identification may also be recorded on the bunker delivery note.

5. Section 3 and 4 of this notice do not apply to fuels supplied in gaseous form such as compressed natural gas, liquefied natural gas or liquefied petroleum gas.

6. It should be noted that the Order makes it an offence if a local supplier of fuel oil:

6.1. fails to register with the Department in accordance with the provisions contained in Section 2 of this notice;

6.2. fails to provide to a vessel of over 400 GT to which fuel oil is delivered, a bunker delivery note, containing as a minimum the information outlined in this notice; and

6.3. fails to provide a representative fuel sample, taken into account the guidelines in this notice, along with that bunker delivery note.
