

# Manx Marine Environmental Assessment

## List of Contributors

The following list of contributors is based on the second edition of the MMEA. Contributions have ranged from provision of detailed technical content i.e. when information has not been previously compiled; to the provision of existing publications, review and discussion. The list does not reflect the total number of people who have contributed previously to the first edition.

If there are individuals or organisations currently missing from this evolving list, or if we have made any mistakes in your name or affiliation, please let us know. In addition, if there are key people or organisations who you think we should involve in the future, who could offer a valuable contribution, please let us know.

List updated October 2018.
