IOM Sight Test Frequency - Minimum Intervals

Age	Clinical Condition	Interval
Under 16	All patients	1 year
16 – 59	All patients	2 years
60 – 69	All patients	2 years
70 & over	All patients	1 year
Any age	Diabetic	1 year
Any age	Glaucoma	2 years
40 & over	Glaucoma family history (not in monitoring scheme)	1 year
	Ocular hypertension (not in monitoring scheme)	1 year
Under 7	BV anomaly / corrected refractive error	6 months
7 – under 16	BV anomaly or rapidly progressing myopia	6 months

Early Re-test Reason Codes

4	
1.	Patient is at risk of frequent changes of prescription for
	reasons not requiring medical referral or for
	reasons already known to a medical practitioner.
2.	Patient has pathology likely to worsen, for example
	age-related macular degeneration, cataract, corneal
	dystrophy or congenital anomalies.
3.	Patient has presented with symptoms or concerns
	requiring ophthalmic investigation: 3.1 resulting in
	referral to a medical practitioner; or 3.2 resulting in
	issue of a changed prescription; or 3.3 resulting in
	either no change or no referral (the patient's record
	should indicate any symptoms shown to support this
	category of claim if necessary).
	category of claim in necessary).
A	A 4 Detient reading complex lenges, or 4.2 with
4.	4.1 Patient needing complex lenses; or 4.2 with
	corrected vision of less than 6/60 in one eye.
4. 5.	corrected vision of less than 6/60 in one eye. Patient has: 5.1 presented for a sight test at the
	corrected vision of less than 6/60 in one eye.
