Transport guidance

Isle of Man Public Health Directorate

Stay at home for 14 days, this includes all household members if you live with others

SEEK CLINICAL ADVICE
use the online assessment
gov.im/covidtest
to determine whether a call needs to be made to the COVID 111 helpline.

Stop the spread of coronavirus

If you have a

new and continuous cough
or
high temperature

Wash your hands more often and for 20 seconds

Use soap and water or a hand sanitiser when you:
- Get home or into work
- Blow your nose, sneeze or cough
- Eat or handle food

Cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze dispose of the tissue straight away

Passengers should wash their hands before and after they have been on public transport

Frequently clean and disinfect objects and surfaces that are touched regularly, using your standard cleaning products

Advise passengers they should not travel if they are feeling unwell with symptoms of coronavirus - a new, continuous cough or a high temperature. This will also help to protect others from infection

Use announcements in transport hubs to reinforce key messages, such as washing hands before and after travel, and what to do if unwell

If someone becomes unwell while at a transport hub or on their journey with a new, continuous cough or a high temperature, they should be sent home and advised to seek clinical advice using the online assessment at gov.im/covidtest to determine whether they need to call the COVID 111 helpline. They must self-isolate for 14 days from the onset of symptoms, regardless of whether the test result is positive or negative. If the test is positive, details will be passed to the Public Health Contact Tracing Service so any contacts can be followed up and advised.
