1. An international phenomenon and pop-culture classic, *The Hitchhiker's Guide to the Galaxy* has been a radio show, TV series, novel, stage play, comic book and film. Following the galactic (mis)adventures of Arthur Dent, Hitchhiker’s in its various incarnations has captured the imaginations of curious minds around the world . . .

2. Despite of the enormous efforts of researchers and clinicians to understand the pathophysiology of falls in older adults and establish preventive treatments, there is still a significant gap in our understanding and treating of this challenging syndrome, particularly when we focus in cognitively impaired older adults. Falls in older adults are a very common yet complex medical event, being the fifth leading cause of death and a main cause of insidious disability and nursing home placement in our world aging population. Importantly, falls in the cognitively impaired double the prevalence of the cognitively normal, affecting up of 60% of older adults with low cognition and increasing the risk of injuries.

3. A must have for any nurse wanting to expand their knowledge in this area of wound care. *Wound Care Nursing* 3rd edition introduces a person-centred approach to wound care practice across the lifespan. The books is fully illustrated with colour photographs and illustrations throughout, and including extensive case studies to demonstrate the practical applications of the most recent research in this area.
4. Clinical Investigations at a Glance provides an up-to-date, evidence-based overview of diagnostic investigations, looking at their choice, importance and interpretation for commonly presenting symptoms and conditions.

Designed to help develop the evidence-based use of investigations and interpret results properly, the book provides a unique perspective on many critical issues in medical testing, with the aim of improving diagnostic accuracy and reducing unnecessary tests or harm. Clinical Investigations at a Glance is structured in three parts: an overview of tests; common presentations (such as chest pain, nausea and vomiting, weight loss and anaemia); and conditions organized by body system, such as cardiovascular disease, respiratory disease and nephrology.

5. Expert authors have contributed clinical review articles on the following topics: STI Prevalence in the United States and the relationship to the social determinants of health; Psychosocial aspects and ethical concerns of STIs treatment and management; Update on guidelines for STI treatment and management - adults and adolescents; STIs and HIV; Proctitis in MSM; Herpes simplex Virus; Pharmacological updates on Hepatitis C treatment; The Reemergence of Syphilis: Clinical Pearls for consideration; The use of technology in the screening and management of STIs; Decreasing barriers to sexual health in the LGBTQI community; STIs and pregnancy; Update on pharmacology of HIV; An update on HPV guidelines; and Pre-exposure (PrEP) prophylaxis versus Post exposure prophylaxis (PEP). Readers will come away with the updates and information they need to improve patient care and outcomes in patients with sexually transmitted infections.
