This patient group direction (PGD) must only be used by registered health professionals who have been named and authorised by their organisation to practice under it. The most recent and in date final signed version of the PGD should be used.

Patient Group Direction (PGD)

For the administration or supply of

Ibuprofen tablets 200mg, 400mg, oral suspension 100mg/5ml

By registered health care professionals for

Inflammation and soft tissue injury

Throughout the Manx Care and those contracted by the Manx Care where appropriate within practice

PGD NUMBER - 90

1. Change history

Version number	Change details	Date
1	Original PGD ratified	June 2021

2. Medicines practice guideline 2: *Patient group directions*

Refer to the relevant sections of NICE medicines practice guideline 2: *Patient group directions* as stated in the blank template notes. For further information about PGD signatories, see the NHS and Manx Care PGD website FAQs

3. PGD development

Refer to the NICE PGD competency framework for people developing PGDs

Job Title & organisation	Name	Signature	Date
Author of the PGD			
Member of the PGD working group			

4. PGD authorisation

Refer to the NICE PGD competency framework for people authorising PGDs

Job Title	Name	Signature	Date
Medical Director			
Chief Pharmacist/ Pharmaceutical Adviser			
Senior Paramedic			
Director of Nursing			
GP Adviser			
Senior Microbiologist (if PGD contains antimicrobials)			

5. PGD adoption by the provider

Refer to the NICE PGD competency framework for people authorising PGDs

Job title and organisation	Signature	Date	Applicable or not applicable to area

6. Training and competency of registered healthcare professionals, employed or contracted by the Manx Care, GP practice or Hospice

Refer to the NICE PGD competency framework for health professionals using PGDs

	Requirements of registered Healthcare professionals working under the PGD
Qualifications and professional registration	• Registered healthcare professionals, working within or contracted by the Manx Care, GP practice or Hospice who are permitted staff groups outlined within the current PGD policy • Pharmacists must be practising in Manx Care authorised premises i.e. contracted pharmacy premises
Initial training	• Knowledge of current guidelines and the administration of the drug specified in this PGD/BNF and of the inclusion and exclusion criteria • Training which enables the practitioner to make a clinical assessment to establish the need for the medication covered by this PGD • Local training in the use of PGDs
Competency assessment	Staff will be assessed on their knowledge of drugs and clinical assessment as part the competency framework for registered health professionals using PGDs
Ongoing training and competency	The registered health care professionals should make sure they are aware of any changes to the recommendations for this medication; it is the responsibility of the registered health care professionals to keep up to date with continuing professional development. PGD updates will be held every two years

7. Clinical Conditions

Clinical condition or situation to which this PGD applies	Inflammation and soft tissue injury
Inclusion criteria	• Patient soft tissue injury with inflammation • Patients over the age of 3 months of age • Body weight over 5kg in weight
Exclusion criteria	• not licenced for children under 3 months of age or body weight under 5kg • varicella infection • patient suffering from asthma • hypersensitivity reaction to NSAIDs • patients in liver, kidney or heart failure • allergic to aspirin • active or history of recurrent peptic ulcer/haemorrhage • history of gastrointestinal bleeding or perforation, related to previous NSAID therapy • gastrointestinal ulceration • pregnancy
Cautions (including any relevant action to be taken)	• Allergic disorders (in adults) • Cardiac impairment (NSAIDs may impair renal function) • Cerebrovascular disease • Coagulation defects • Connective-tissue disorders • Crohn's disease (may be exacerbated) • Elderly (risk of serious side-effects and fatalities) (in adults) • Heart failure • Ischaemic heart disease • Peripheral arterial disease • Risk factors for cardiovascular events • Ulcerative colitis (may be exacerbated) • Uncontrolled hypertension
Arrangements for referral for medical advice	Patient should be referred to a more experienced clinical practitioner for further assessment
Action to be taken if patient excluded	Patient should be referred to a more experienced clinical practitioner for further assessment
Action to be taken if patient declines treatment	• A verbal explanation should be given to the patient on: the need for the medication and any possible effects or potential risks which may occur as a result of refusing treatment • This information must be documented in the patients' health records • Any patient who declines care must have demonstrated capacity to do so • Where appropriate care should be escalated
