Summary of key points in report

The Manx Care Absence Report for August 2021 is attached for the information of the Board.

It shows an increase since the inception of Manx Care in April from 5.53% to 7.10%. The most significant increase in reasons for absence are in the chest/respiratory, cough, cold, flu symptoms, Covid related and the gastro-intestinal/vomiting diarrhoea categories.

Recommendation for the Board to consider:
