1. Introduction

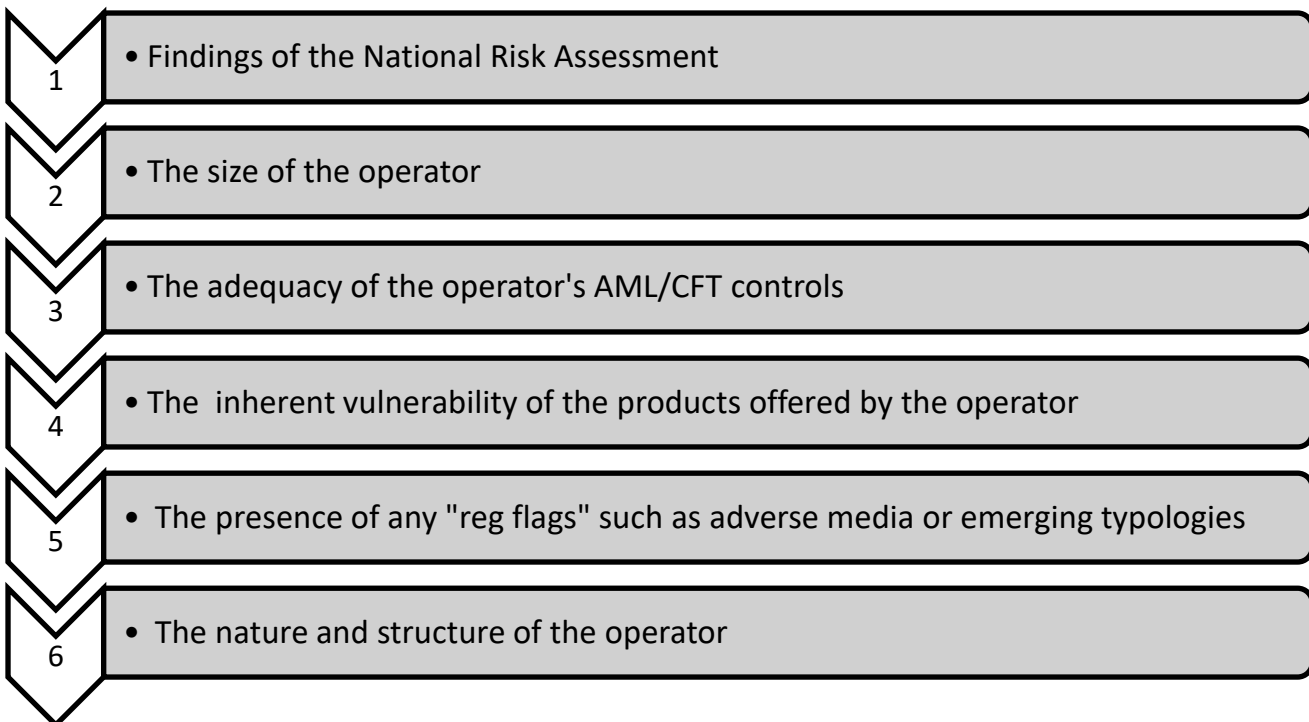

The Gambling Supervision Commission (GSC) is the regulator that supervises the gambling sectors' compliance with Isle of Man gambling and Anti-Money Laundering and Countering the Financing of Terrorism (AML/CFT) legislation and regulations made under the Online Gambling Regulation Act 2001 (OGRA), associated guidance and licence conditions.

This document describes only the actions that the GSC uses during its routine supervision. As AML/CFT or compliance issues emerge or as particular findings dictate, the GSC may formulate responses that fall outside of this guidance.

2. The Risk-Based Approach

The Financial Action Task Force (FATF) Recommendations require countries to adopt a risk-based approach to combatting money laundering (ML) and terrorist financing (TF). By adopting a risk-based approach to supervision the GSC is able to effectively and efficiently allocate resources.

The GSC assesses the ML/TF risks posed by online gambling operators based on the factors below and determines the intensity, frequency and scope of supervision based on that assessment and ongoing compliance performance.

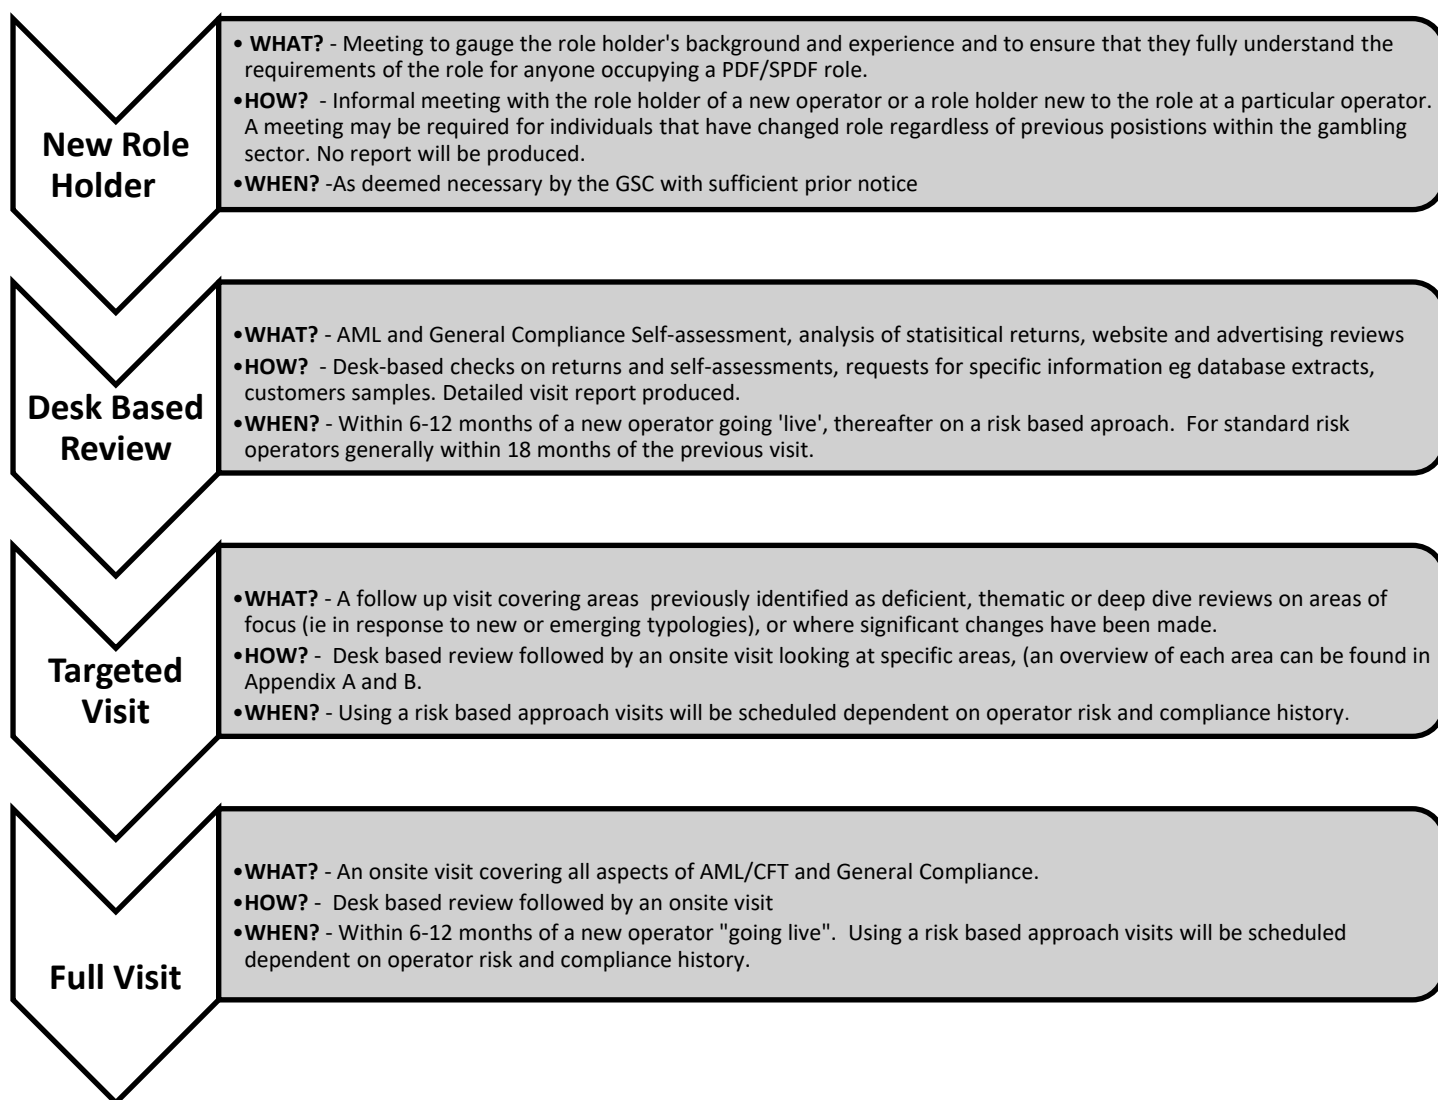

3. Oversight Methods

The GSC supervises compliance through a combination of self-assessments and on-site reviews. Desk-based reviews of self-assessments and any documents provided allow the GSC to assess an operator's policy and process. On-site activities include visits to operators' premises, customer sampling and face-to-face meetings.

On-site visits may be standalone visits or combined AML/CFT and General Compliance visits depending on the risk assessment of the operator, the time since the latest AML/CFT or General Compliance visit, the next scheduled visits, and the availability of the GSC's Officers.

Types of Supervision:

4. Visit Process

Supervisory visits (whether AML/CFT or General Compliance only or combined will be made up of three parts:

- a self-assessment that will be subject to a desk-based review for which the GSC will request information upfront about processes and systems along with a database sample;
- an onsite visit where checks will be carried out on how those processes and systems are operated. Funded test accounts may be required and demonstrations will be sought to ensure that the systems are functioning as they should; and
- a further period in which the visit report is drafted and any queries resolved.

4.1 Pre-visit

Wherever possible, the GSC Officers will contact operators at least one month prior to arrange a mutually agreeable time to schedule an AML/CFT visit or General Compliance visit. Various documents and information will be required ahead of the on-site visit.

Supplying the requested pre-visit information on time allows the GSC to perform any desk-based elements ahead of the visit. If this information is late and the GSC is unable to complete these checks then it is possible the visit will be delayed or the MLRO will be asked to perform the extract during the visit itself.

The law expects that licensees are both willing and able to combat money laundering and terrorism and to be compliant with legislation, a licensee that is late supplying information may be asked to formally explain the underlying reasons why it cannot supply information on time. It is important that if the inability to supply arises from uncertainty over what the GSC requires, the GSC must be contacted immediately.

A list of the AML/CFT documentation and information that could be provided along with the self-assessment is provided at Appendix A. A list of General Compliance documents and information that could be provided in support of a self-assessment is provided at Appendix B. These lists are not exhaustive and operators can utilise other means to demonstrate compliance, however, in most cases the list outlines the GSC's minimum expectations for demonstration compliance in that area.

A list of the information to be included in database samples/extracts is provided at Appendix C.

IMPORTANT: Please note that additional documentation or information may be requested (particularly those operators providing bespoke rather than retail products and services).

4.2 Self-assessment

As part of the visit process operators will be issued with an AML/CFT self-assessment and General Compliance self-assessment template to complete prior to the visit. The self-assessment process can be used as a stand-alone method of supervision where operator risk is deemed very low and will not always form part of a visit. The template is split into supervisory areas, outlines what the GSC's requirement is, the source of that requirement, (legislation, guidance or licence condition), and operator self-assessment in that area. Templates for self-assessments are provided at licensing and should be completed and returned well in advance of any scheduled visits.

Information and evidence provided as part of self-assessments will be scrutinised and actions raised, with given timeframes to be completed, where any deficiencies are found. Any areas marked as partially met or not met should be accompanied by remediation plans for ensuring that area is brought into compliance. The self-assessment will also be used to inform the supervisory visit where technical process will be checked in practice. For operators who have completed a self-assessment, subsequent assessments will consist of an update to the information provided.

4.3 On-site

At least one Director and the Designated Official or Operators Manager should be present at the visit. The Money Laundering Reporting Officer (MLRO) or the Deputy MLRO and AML/CFT Officer should be present for any on-site visit that includes an AML/CFT aspect. If for any reason this is not possible, please contact the GSC at the earliest opportunity so that alternative arrangements can be made.

Funded test accounts may be requested for the visit and will be used to sample the customer journey whilst on-site. The account should not be named or set up in a way that would alert customer services that the account is a test account or being utilised by the GSC.

The GSC's Officers will require a private room or convenient area to operate. During the visit the Officers will ask questions and request demonstrations of an operator's systems.

A list of example on-site type checks can be found at Appendix D.

4.4 Post-visit

A draft visit report will be sent out shortly after the on-site visit. The report will set out:

- the topics covered;
- a brief overview of the responses provided;
- any observations;
- any areas noted as deficient and, where appropriate, actions required to address any deficiencies.

Operators will be invited to comment on the factual accuracy of the report in order for the GSC to take any comments into consideration before issuing a final report.

The report findings plus completion of any actions arising from the visit will be taken into account in the GSC's risk based approach to supervision (please see Section 2 of this document for further detail).
