

NOTICE TO MARINERS

No 3 of 2022

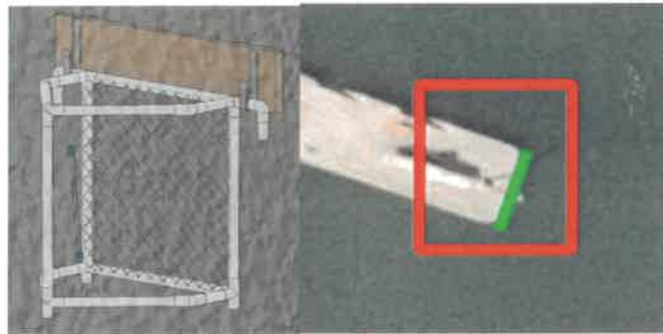

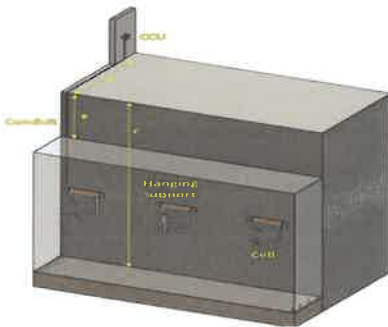

Isle of Man – Douglas Harbour

Wall mounted scientific equipment Victoria Pier

The Harbours Division of the Department of Infrastructure wishes to advise mariners of the following equipment which has been installed on the seaward end of Victoria Pier in Douglas Harbour.

This monitoring equipment is supported by weighted lines from the quayside allowing for recovery and inspection, with the basket type structure situated approximately 2m below the low water mark.

The equipment will be in place for approximately 3 months and during this time 'NO BERTH' signs will be displayed. The equipment will not constitute a hazard to navigation but to avoid damage to the equipment itself vessels are instructed to keep clear of the pier end especially at low water periods.

For further information please contact:

Marine Operations Centre, Douglas Harbour on VHF ch12 or Tel 01624 686628
