Area Plan for the North and West—Draft Plan

EPD4 Community Facilities Audit

**Cabinet Office
24 June 2022**

Introduction

This evidence paper will identify and quantify existing community facilities in the North and West of the Island and compare the existing provision to targets set out in the Isle of Man Strategic Plan 2016. For some types of community facilities the Strategic Plan does not provide said targets. Nonetheless, these facilities, such as health care facilities, community centres and Parish and Village halls, schools and places of worship along with many others are considered important to the development of effective and vibrant communities.

What are community facilities?

Community facilities are essential to everyday life and range from schools and medical centres, to post offices, community centres and playgrounds. The adequate provision of community facilities can help generate a sense of togetherness, and allow for the development of sustainable, self-sufficient communities. As mentioned above, the Strategic Plan provides targets for the provision of some facilities per 1,000 head of population; namely amenity space (0.8 ha), sports pitches (1.8 ha) and children's play space (0.6 ha). This audit however, also assess the provision of other sports facilities, education and health and social care facilities such as schools and nursing homes, community facilities such as church and parish halls and cultural facilities such as museums and heritage centres and art galleries, to name a few.

Methodology

The majority of facilities which were included within this audit were listed on the websites of Local Authorities and Government Departments and Statutory Bodies. Smaller and less formal facilities were often not identified on such websites, and in this case, these sites were included in the audit through local knowledge and the use of satellite imagery and mapping software.

For the purposes of this audit, and in accordance with the Isle of Man Strategic Plan, only the hectareage of amenity land, sports pitches and children's play space has been measured. The presence of other community facilities has been recorded, and this is reflected in the availability table.

Sites were measured using the measurement feature on the DEFA Planning Applications map on MannGIS and the resultant hectareage was recorded in the tables. It is important to note that as this was a desktop study, no site visits were conducted.

Once measured, facilities were grouped according to their Parish or Local Authority area and a per 1,000 head of population figure was produced where appropriate in order to compare existing provision to targets set out in the Isle of Man Strategic Plan.

Recommendations

Further to the recommendations of the Community Facilities Audit associated with the Draft Area Plan for the East, it is recommended that this audit is updated annually (or in conjunction with the preparation of a Local or Area Plan) in order to maintain an accurate record of the community facilities within the North and West of the Island.

	Total=		215.1
North and West population=	23825	Per 1000=	9.03

Note - As consistent with the approach adopted during the Area Plan for the East, it is decided that National Glens, as with over exceptions (Plantations, beaches, reservoirs, Rights of Way across agricultural land, church yards, burial grounds and cemeteries and areas not normally accessible to the public), do not meet the definition of Amenity land adopted in the aforementioned Plan. Nevertheless, existing provision is recorded as part of this audit for reference purposes only.

Note - In this iteration of the Community Facilities Audit, the sports pitches of several schools within the North and West are recorded as contributing towards local supply. A distinction is made between a sports pitch and a school field and where a school had a sports pitch as part of a larger field which in itself provided general recreation and games provision associated with the school, only the area demarcated for pitch use was measured as part of this audit. One exception to this was the football and rugby fields at QEII in Peel where the whole area was measured. Pitches associated with schools were also discounted if public access was not available outside of school hours
