2. The new solution must be built using .Net (C#) Framework to comply with Government Technology Services Technical Code of Practice;
3. Create an IT System that can integrate real-time with other government systems such as income tax and benefits payments;
4. Migrate National Insurance data from legacy system to new solution, ensuring data integrity is maintained;
5. Automate manual processes where possible;
6. Improve processes, process and procedural validation and reduce the number of errors.
