KPI calculations

AB		Herd 1	Herd 2	Targets
Mating	Cow to bull ratio			>40
PD	Percentage of cows and heifers scanned in-calf (%)			>96%
Calving	Calves born alive per 100 cows/heifers put to the bull			>95
	Calves weaned per 100 cows and heifers put to bull			>94
	Calves died from birth to weaning per 100 cows and heifers put to bull			<3%
	Calving period (weeks)			<12 wks
Growth rates				
	Percentage of cows and heifers calving in first 3 weeks (%)			>65%
	Percentage of cows with calving interval below 370 days (%)			>90%
	Average age at weaning (days)			
Replacements	Average weight at weaning (kg)			
	Average daily liveweight gain to weaning (kg per day)			>1.1 kg
	Average 200 day calf weight (kg)			
	200 day calf weight per cow and heifer put to bull (kg)			
	Empty cows and heifers (%)			<5%
	Cow mortality (%)			<2%
	Percentage of cows culled (%)			<6%
	Herd replacement rate (%)			<13%
