Oversight Framework Performance for 2022/23

It should be noted that Manx Care have undertaken significant work to establish a programme to enhance the integrity and validation of performance data, from a baseline of very little accurate data being available to report. This work-stream is ongoing and is likely to take most of 2023/24 to complete. The metrics and methods for measuring Manx Care's organisational performance continue to mature, and as such only fully validated data is included in this report. As further metrics become validated, these will be included in this report. This is a position accepted by the Department in understanding the longer term journey of continuous improvement.
