### **Introduction - 1**

#### Integrated Performance Report (IPR) development

The programme of work to develop and improve the content and format of the IPR continues. The aim of this work is to ensure that the IPR continues to improve in its provision of a meaningful context for the levels of performance being achieved across the organisation. A more structured and concise format gives a clearer and greater sense of assurance that areas of challenge are being identified and addressed efficiently and effectively, and that areas of good practice are being highlighted and learned from.

The development of the IPR is an iterative process which will continue over the course of 2023/24. The Performance Improvement & Management Service (PIMS) remain responsive to feedback received from colleagues, the Board and the public with regard to the evolution of the content and format of this report. Recent developments/amendments to the report include:

#### • Key Performance Indicators (KPIs)

PIMS continue to work with the Care Group leads within Manx Care, and the DHSC to review the KPIs and operational metrics and standards that are currently being used to monitor and manage the organisation's performance. This is to ensure that they are aligned with the requirements of Manx Care's Operating Plan, the DHSC's Mandate to Manx Care and Single Oversight Framework (SOF) and the government's 'Our Island Plan'. Nominated leads within the Care Groups havebeen identified to be responsible for the delivery of each KPI. Where existing reporting does not cover all of the requirements, PIMS are working with the Business Intelligence (BI) team and service area leads to develop the required measurement and reporting mechanisms and processes.

Manx Care have now transitioned to using the new version of the National Cancer Waiting Time Guidance (version 12.0) in terms of operational and performance management and reporting, and this month's IPR has been amended to reflect this.

#### Notes regarding the format of the IPR

#### • Red/Amber/Green (RAG) ratings for Reporting Month performance

The achieved performance against each KPI is colour coded to make it clearer whether or not the required standard has been achieved in the reporting month:

Achieved performance is equal to, or exceeds the required standard.

Achieved performance is 15% or less below the required standard.

Achieved performance is more than 15% below the required standard.

It should be noted that the RAG rating is only representative of the performance achieved in the current reporting month, and does not necessarily give the full picture in terms of an improving or worsening position. It should therefore be considered in conjunction with the Variation and Assurance indicators as described on the following page.

Only KPIs and metrics with an associated standard/threshold have been RAG rated.

#### Alignment to CQC recognised domains

The key performance metrics are categorised and aligned to the following CQC recognised domains:

Safe - are our service users protected from abuse and avoidable harm.

Effective – does our care, treatment and support achieve good outcomes, help service users to maintain quality of life and is based on the best available evidence.

Caring – do staff involve and treat service users with compassion, kindness, dignity and respect.

Responsive - services are organised so that they meet service user needs.

Well Led - the leadership, management and governance of the organisation make sure it's providing high-quality care that's based around service users' individual needs, that it encourages learning and innovation, and that it promotes an open and fair culture.

To ensure that the holistic view of a Service Area's performance is not lost, future iterations of the report will also include a Performance Summary for each Service Area.

#### Structured narrative

Supporting narratives for the performance indicators are structured in a consistent format. This sets out the detail of the issues and factors impacting on the performance, the planned remedial and mitigating actions that Manx Care is taking to address the issues, and the expected recovery timescales in which performance is expected to become compliant with the required standards (through the implementation of the remedial actions).

Issue -> Remedial Action -> Recovery Trajectory

#### Data Validation and Automation

It has been acknowledged that, in its current form, the compilation of the IPR (and the reporting of performance in general) is an extremely manual process, pulling together data from a variety of un-validated reports and data sources without clear definitions of the purpose and value of each Key Performance indicator (KPI).

The BI team have been working to re-develop, automate and validate the KPI reporting through the construct of datasets. This is a large task and involves spending time in and working with every service area within the department. The plan of works to develop an automated dataset for each area has continued into 2023/74.

As each new dataset is developed, new reporting will replace the current reporting and eventually ManxCare will have a fully automated report.

PIMS is working with the BI team to support the development of performance reporting in a format that aligns with the performance monitoring processes and requirements under the Performance & Accountability Framework. This currently involves an interim reporting process requiring some manual input until the BI team have automated all of the required datasets.

Each domain summary sheet includes a 'B.I. Status' indicator which indicates which KPIs / datasets are still collated manually (or the automated data is still being validated with the service area), those indicators that have been validated and automated and those indicators where the automation work or other issue means that the data is temporarily unavailable:

Data automated and validated.

Data collated manually or automated data still being validated by service area.

In this context 'Validation' means that the input, methodology/calculation and outputs for a given metric have been checked by both the Business Intelligence Team and Care Group leads and confirmed to be in accordance with the corresponding technical specification for that KPI. This is to ensure that the performance for that item is being measured and reported accurately.

However, it is possible that unforeseen data quality issues may exist within the validated data. Manx Care has therefore implemented a Data Quality Working Group that will pro-actively look to identify and address any matters of quality or integrity within the data used for operational and reporting purposes.

#### Statistical Process Control (SPC) Charts

The report uses Statistical Process Control (SPC) charts to enable greater analysis of trends and variation in performance.  $\mathfrak{P}C$  charts are used to measure changes in data over time, and help to overcome the limitations of Red-Amber-Green (RAG ratings) through the use of statistics to identify patterns and anomalies to distinguish changes worth investigating (Extreme values) from normal and expected variations in monthly performance.

This ensures a consistent approach to assessing both Variation and Assurancefor achieved performance:

	VARIATION			ASSURANCE	
If 6 points or more in a row of continuous improvement or If 6 dots or more in a row are better than the base line mean	Special Cause of Improving variation (High/Low)	H	If last 6 points are equal to or better than the target	Consistently hit target	P.
If 6 points or more in a row of continuous worsening	Special Cause of Concerning	(He)	If last 6 points are worse than the target	Consistently fail target	C.F
If 6 dots or more in a row are worse than the base line mean	variation (High/Low)		If last 6 points are a mix of better and worse	Inconsistently passing and falling short of target	(?
If none of the above criteria is	Common cause	(0,20)			

The process for assigning the categories to each KPI is currently a manual one, but PIMS are currently working with the BI tem to automate the process of generating the SPC charts and allocating the appropriate categories for Variation and Assurance.

#### Benchmarkin

In order to measure Manx Care's performance against recognised best practice and the performance of other peer organisations within Health and Social Care, some initial benchmarks have been added to a number of the KPIs and metrics within the report. This benchmarking will enable Manx Care to identify internal opportunities for improvement.

When making such comparisons, it is vital to ensure that the methodology used to calculate Manx Care's performance exactly maches that of the benchmarked performance to ensure that a like-for-like comparison is being made.

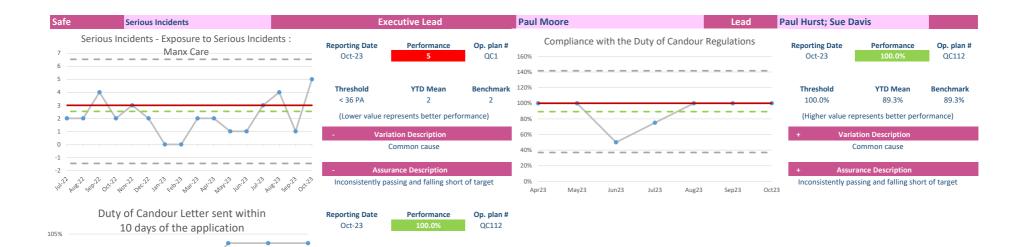

Therefore, the benchmarks included in this month's report should be treated as indicative only until such time as the alignment of the methodologies used has been reconciled and confirmed.

Work to identify appropriate peer organisations and metrics to benchmark Manx Care's performance against is ongoing, and currently many of the benchmark figures within this report use Manx Care's 2022/23 performance as a baseline. Details of the benchmark methodologies applied for each KPI and metric can be found within the 'Assurance / Recovery Trajectory' section of the supporting performance narratives.

# **Executive Summary**

	Going Well	Cause for Concern
Safe	27 consecutive months without a Never Event. One Medication Error with Harm across Manx Care in October. Numbers of Falls that resulted in Harm remain low and within the expected threshold. Positive achievement against Safety Thermometer for Adults and Children. Performance of VTE prophylasis exceeded the threshold with 99%. VTE risk assessment within 12 hours continued to improve to 94.5% which is just belowthe 95% standard. There were no cases of MRSA in October. 100% of letters were sent in accordance with Duty of Candour Regulations. Only one case of community associated CDI. The Pressure ulcer incidences reported decreased to 11 over the period, 8 were category 2 (or equivalent) and 3 were Cat 3/unstageable.	• 5 incidents declared an SI at SIRG in July which were declassified at SIRG in October; However, the YTD total of 17 remains within target parameters.  • 48-72 hr senior medical review of antibibitor prescription was 82% and remains below the 98% threshold.  • There have been 8 cases of E.coli bacteraemia which were all community associated.  • Harm Free Care Score for Maternity falls short of the target for the first time this year. However, given the very low number of patients (5) any safety issue would effectively push the score beneath the target.
Effective	Continuous increase in the number of Theatre sessions delivered.  97% of Learning from Death reviews were completed within timescale which exceeds the target for the ninth month in a row.  The Crisis Team performance has decreased, but is still meeting the 1 hour response time threshold for Emergency Department referrals.  Adult Social Care re-referral rates remain within expected levels.  The reported number of individuals receiving copies of their Wellbeing Partnership assessments in October was 100%.  95.6% of Nutrition and Hydration 7 days compliance reported for October, achieving the threshold of 95%.  During October, 95.83% of MARFs were completed on time (23 out of 24).	Access to surgical bed base continues to challenge theatre efficiency and utilisation. Consultant anaesthetic staffing and theatre staffing position remains a challenge. 88% of Looked After Children reviews were completed which was slightly below the standard. However the standard has been achieved in 5 out of the last 6 months.
Caring	Manx Care has consistently met gender appropriate accommodation standards in the year to date.  MCALS is responding to a high proportion of queries within the same day (89%). Service user satisfaction remained high for the tenth consecutive month: 91% of service users rated their experience as "Very Good" or "Good" using the Friends & Family Test in month. 29 complaints logged but remain below the expected threshold. Overall Manx Care compliance of complaints acknowledged within 5 days in October was 100%.	
Responsive	Cancer 28 Day performance in October was 75.3% achieving the expected 75% threshold. Inpatient and Daycase waiting list numbers and waiting times remain at or below the baseline levels, primarily as a result of the Restoration & Recovery activity for Orthopaedics, Ophthalmology and general surgical specialities. The 6 hour Average Total Time in Emergency Department standard continues to be achieved. A good performance was maintained in Ambulance service for Category 2 - 5 response times. Mental Health caseloads remain within expected levels.	Outpatient waiting list has slightly increased in November and remains above the baseline. The ED Performance against the 4 hour standard has slightly increased in October but remains below the required target at 71%. Emergency care demand remains high and the Emergency Department (ED) footprint does no meet the needs of the service (e.g. no CDU). Staffing has also impacted on KPI delivery but recruitment to all grades of doctor within ED and nurses is ongoing. There were 48 12-Hour Trolley Waits, comparing to 67 in the previous month. Category 1 performance worsened although the number of category 1 calls for the month was lower than average, allowing for more variation. Access to routine diagnostics within 6 weeks and 26 weeks remains challenging due to increasing demand exceeding current capacity. However, additional diagnostic activity is being undertaken under the auspices of the restoration & recovery programme.  *There were 24 breaches of the 60 minute ambulance turnaround time in October (31 in September).  *The ED reached the highest Operational Pressures Escalation Level (OPEL), Level 4, in October for 2 days.
Well Led (People)	Manx Care staff across all specialisations continue to demonstrate their commitment to their GDPR responsibilities and engage well with the Information Governance team and their responsibilities to handling data safety and correctly.      Manx Care have had the pleasure of welcoming the interim Information Commissioner and staff to a meeting on site at Nobles Hospital. It was a very positive meeting and we look forward to working closely with the Commissioner and his office in the future.      The trend of reduced rates of sickness absence, compared to previous years, evidenced in the first quarter 23/24 has continued. October has seen an increase to 7%, but remains below the monthly average of 77% in the previous year. An executive level review of sickness absence cases has commenced in November '23 to ensure proactive management of absences by Care groups.	There were 14 Data Breaches in October.  As reported previously, the number of Subject Access Requests and Freedom of Information Requests whilst varying from month to month still maintains an upward trend and meeting the deadlines to issue responses continues to be challenging. At the end of October there were 16 Subject Access Requests overdue for response which is a slight increase from September (12), however this represents a significant improvement against the beginning of the year. Staff continue to make every effort to meet their responsibilities in challenging circumstances.  Reported rates of Covid related absence remains low at 0.9% work-time lost in October, however this represents a slight increase from September's 0.4%.
Well Led (Finance)		•The operational result for September is an overspend of (£1.8m) with costs reducing by £0.9m compared to the previous month. The forecast includes £4.9m of cost which is expected to be approved from the DHSC reserve fund which would reduce this to (£25.2m).  •YTD employee costs are (£2.8m) over budget.

# Threshold YTD Mean Benchmark <= 17 (204 PA) 18.1 14.1 (Lower value represents better performance) + Variation Description Common cause + Assurance Description Inconsistently passing and falling short of target

#### Issues / Performance Summan

#### Falls (with Harm):

• 0.49 falls with harm per 1000 bed days which remains well below the benchmark as it has since this indicator started being monitored. The YTD mean stands at 0.5, again well below the threshold of <2.

#### Medication Errors (with Harm):

One error with harm reported in IC&PCS, the first for 5 months. The
incident involved insulin where a community patient self-administered the
wrong dose of Novorapid shortly after being discharged from hospital and
had to return to ED for monitoring. Incident being investigated by Ward 4 to
establish any link to incorrect discharge information/TTOs.

#### Pressure Ulcer incidence:

20 PUs were reported across the services. However, using the corrected indicator the number on the dashboard is reduced to 11. This excludes those ulcers (9) that were present on admission, already reported elsewhere, or of category 1. Of the new or deteriorating ulcers, 8 were category 2 (or equivalent) and 3 were Cat 3/unstageable.

#### **Planned / Mitigation Actions**

#### Falls (with Harm):

• Close review of falls with harm is being undertaken to ensure that high quality risk assessment and robust mitigations are being put in place. ADoN for Medicine & Urgent Care has been leading on a number of initiatives, including a new observation policy, a SOP comfort rounds and a review of the design of the frailty ward environment.

#### Medication Errors (with Harm):

• Exposure to harm from medication errors remains low. Continue high vigilance and monitoring to ensure continued low exposure.

#### Pressure Ulcer incidence:

Continued implementation of preventative measures and monitoring.

#### Assurance / Recovery Trajectory

#### Falls (with Harm):

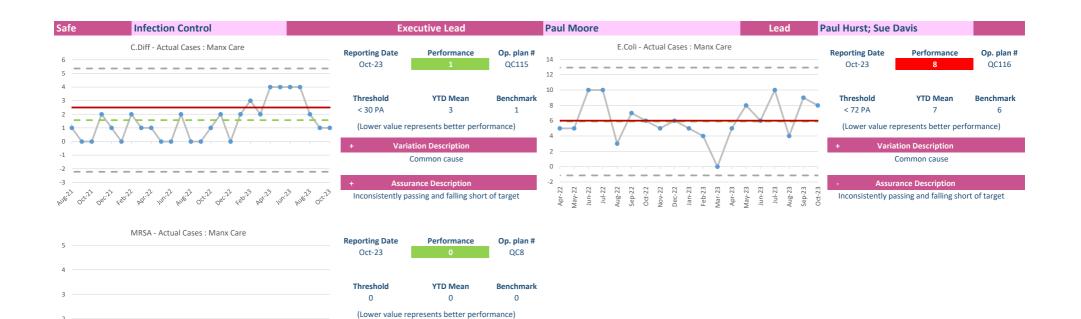

• Performance in this area may continue to exceed the target; however mitigations mentioned above are expected have a positive impact in time.

#### Medication Errors (with Harm):

• Reasonable assurance that errors leading to harm will remain low, with just 3 incidents reported YTD.

#### Pressure Ulcer incidence:

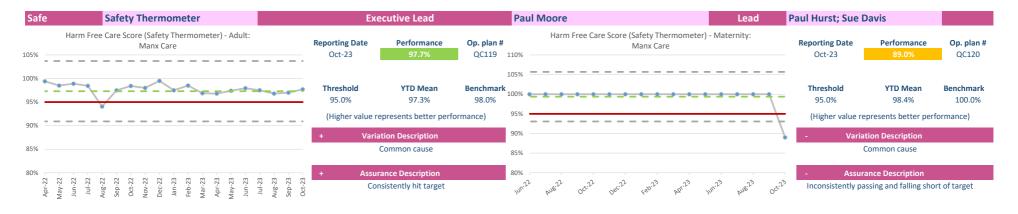

The overall number of PUs this month is a truer reflection following the changes implemented by the TVN and CQS Team to minimise duplicate reporting. This month's figures, therefore, will be used as a benchmark to measure subsequent performance. No safeguarding concerns were raised relating to community based PUs. No trends identified re: PU occurrence in clinical areas.

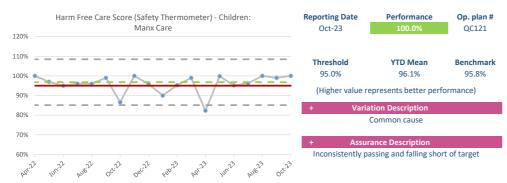

+ Variation Description
Common cause

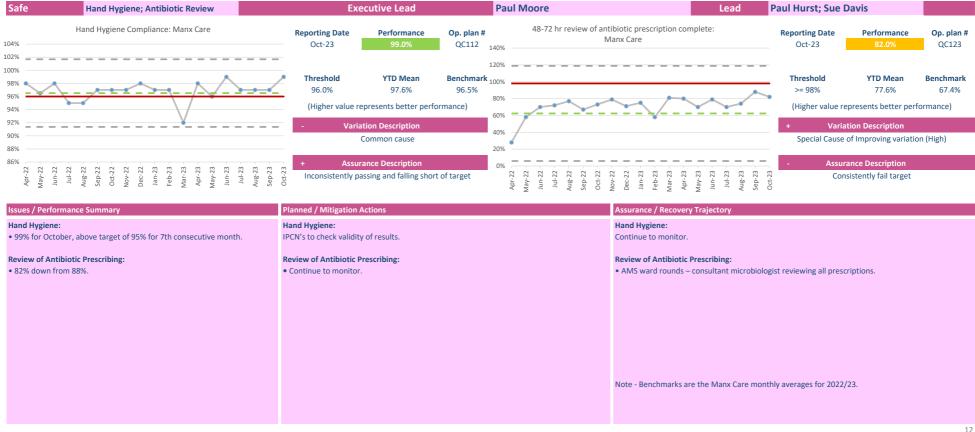

+ Assurance Description
Inconsistently passing and falling short of target

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory

• 1 case community associated.	<ul> <li>CDI management action plan is closely monitored and is progressing. Planned education and activities will be delivered before the end of November.</li> </ul>	The trajectory of CDI rates has reduced below monthly target levels. Continue monitoring.
E.Coli:	E.Coli:	E.Coli:
• 8 cases reported; all community associated.	• Sources include Biliary, UTI's, no long term catheters.	• Confident that the number of cases does not exceed our counterparts in the UK.
MRSA:	MRSA:	MRSA:
• Zero cases reported	Not action required	Continue to monitor
Pseudomonas aeruginosa:	Pseudomonas aeruginosa:	Pseudomonas aeruginosa:
• Zero reported	No action required.	Continue with surveillance.
		Note - Benchmarks are the Manx Care monthly averages for 2022/23.

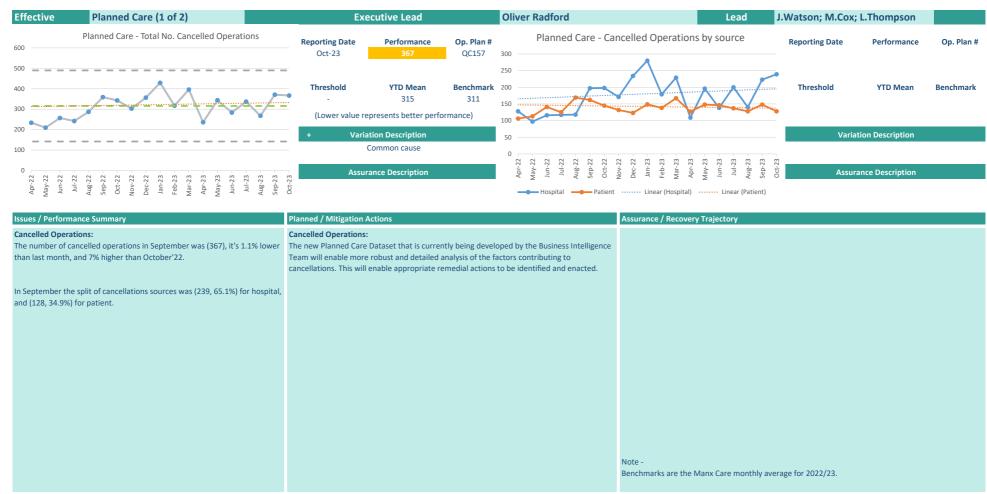

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
Adult: • 97.7% for month and 97% for TYD monthly average. This remains above the target for the whole of the reporting year.	Adult: • Continued and sustained high level of performance throughout the year for adult in patient general areas.	Adult: • High level of confidence that high levels of compliance will continue.
Maternity: • The score of 89% falls short of the target of 95% for the first time this year. However, given the very low number of patients (5) any safety issue would effectively push the score beneath the target. This month there were 2 patients who each had a single safety issue recorded; one was due to maternal infection and the other a postpartum haemorrhage which are incidents that are expected to happen on occasion.	Maternity: • Staff are aware that these types of incidents can occur as a part of usual practice and will continue with activities to maintain compliance.	Maternity: • Anticipated that this will return to its usual performance target
Children: • 100% of Children were kept free from harm. Above target for sixth consecutive month. Monthly average YTD stands at 96%.	Children:  Continue with activities to maintain compliance.	Children: • Performance exceeds target.  Note - Benchmarks are the Manx Care monthly averages for 2022/23.

Issues / Perforr	nance Summary
------------------	---------------

#### Length of Stay:

- The spike in average LOS for RDCH in May was due to a single patient with a very high length of stay being discharged .
- Staffing pressures, closures of ward 12, re-enablement delays and lack of Spot purchasing of community beds availability of residential and nursing care beds have all contributed to longer lengths of stay.
- The acuity of patients being admitted has increased for some surgical patients driving longer lengths of stay in hospital.
- Access to surgical bed base continues to be a challenge continuing high levels of medical patients (and their higher acuity) being admitted means that medical patients are having to be accommodated on surgical wards with a direct impact on number of elective surgical procedures that can be undertaken.
- Regularly have 30–50 medical outliers in surgical beds which creates pressures on medical staffing establishments to review and care for the additional patients as not staffed with medics for these additional patients; staffed according to the number of medical wards.
- Ongoing problems successfully recruiting locum doctor cover for vacant posts and planned leave means that there has been a reduction in endoscopy and outpatient clinic capacity.

#### Inpatient Discharges:

Overall, discharge numbers continue on a slight upward trend, with discharges in October (971) slightly lower than October'22 (949). This demonstrates the consistent discharging of patients despite the challenges around patient flow.

#### Planned / Mitigation Actions

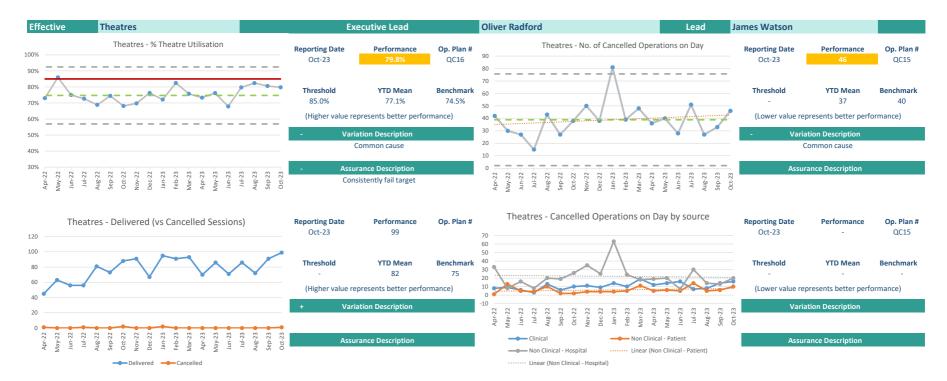

#### Length of Stay:

- Increasing throughput through Day Procedures Suite by using it to start the perioperative Active programme of advertising and recruiting to vacant doctors posts is underway to minimise and surgical journey for the first patient on each operating list to facilitate starting the operating reduce locum doctor requirement. list on time plus reducing number of inpatient procedure where appropriate.
- Ward 12 is being used as an escalation ward when required however there are challenges ensuring safe nursing staffing levels to allow the ward to open. Ward 12 is being staffed by Synaptik nursing teams as part of R & R for specific weeks – in these instances Synaptik nursing staff are able to accommodate a limited number of suitable surgical patients as part of escalation plan.

#### Assurance / Recovery Trajectory

#### Length of Stay:

- Daily activity to ensure surgical patients discharged as soon as clinically appropriate to do Significant improvements in the reduction of length of stays for both R&R and BAU activity (e.g. orthopaedic hip & knee ALOS from 4.5 days down to 1.1 days) will deliver overall decreases in length of stay at both Noble's Hospital and Ramsey & District Cottage Hospital.
- Implementation of enhanced recovery pathways under the Restoration & Recovery (R&R) Reduced LOS on the R&R pathway have allowed all patients to be accommodated on the 15 bed private patient ward (PPU).

#### **Theatre Utilisation:**

- The number of theatre sessions delivered in October was (99).
  September saw an increase in the number of cancelled operations on the day to 46. Most common reason was "Unfit for Surgery-Acute illness, Theatre Staff Unavailable, Operation Not Necessary, Operation Not Wanted and List Over-run".
- Access to surgical bed base continues to challenge theatre efficiency and utilisation which is resultant in late start to operating lists whilst beds are sourced for elective inpatients, on the day cancellation of patients or entire elective list cancellations. Ultimately these issues are increasing the surgical speciality waiting lists.
- challenge and will do so for some time. This will represent a significant cost pressure for the care group for the remainder of this financial year.

   A deep dive into the reasons behind the categories of Miscellaneous, Unfit for Surgery Acute Illness and Operation not Necessary is being taken.

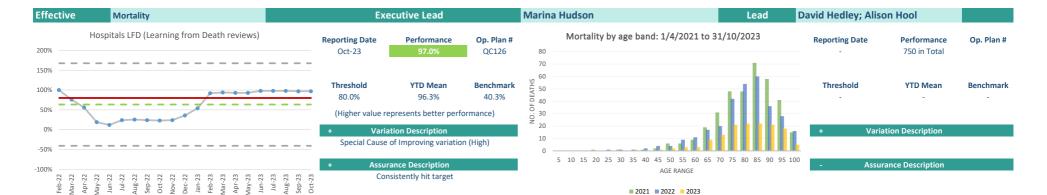

• Consultant anaesthetic staffing and theatre staffing position remains a

#### Planned / Mitigation Actions

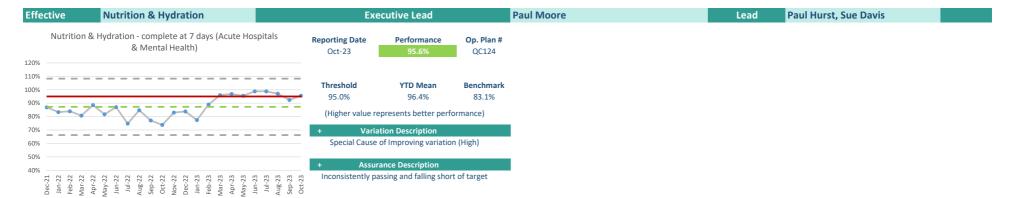

- Increasing throughput through Day Procedures Suite by using it to start the perioperative surgical journey for the first patient on each operating list to facilitate starting the operating list on time – surgical teams informed to Allocate first patient on the To Come In (TCI) list.
   BAU is being supported with Synaptik nursing teams on ward 12 where beds are ring fenced to designated specialties.
- Planning is progressing with regard to an admissions lounge where all surgical patients will
  be admitted, prepared for theatre and returned to a surgical ward post operatively. This will
  provide time for Bed Flow & Capacity team to source a bed without delaying the start to
  operating sessions, reduce the need to cancel and increase theatre efficiency & utilisation.
- Synaptik continues to support the Restoration & Recovery (R&R) waiting list initiatives for
  orthopaedic and general surgical specialties through the provision of theatre teams, surgeons
  & anaesthetists to undertake the surgical activity. Recruitment remains in progress for
  substantive and staff to sustain the BAU activity in 4 theatres, three successful Agenct
  appointments have been made. The vacancy position is improving slightly with successful
  appointments being made.

#### Assurance / Recovery Trajectory

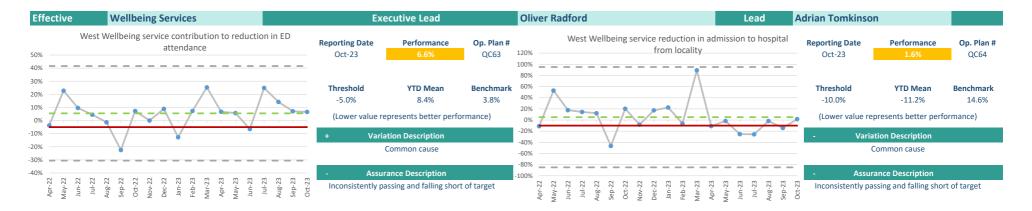

- Manx Care commenced a Theatre Improvement Programme in April 2021 with an initial visit in September 2021, where it was noted that there was evidence of good practice and adherence to the AfPP standards, but also areas where improvements could be made. The Association returned in September 2022, when it was found that all recommendations were met and they were pleased to recommend accreditation of Manx Care's theatres for two years - a peer review is planned to take place in September 2023 to ensure that standards continue to be met.
- The implementation of a surgical admissions lounge which is in the project stages.
- $\bullet \ \ \text{Synaptic support is anticipated to continue until March 2024 under Phase 2 of the R\&R \ programme.} \\$
- Reinforced 48 Hour call out pathway with the rebooking of short notice cancellations into slots where patient has cancelled.
- Exploration of Red to Green Criteria led discharge and assertive in-reach.
- Care Group operational leads have undertaken a deep dive analysis of reasons/causes of hospital led cancellations on the day. Drop down box to be developed in Theatreman to capture reasons for "unfit for surgery - acute illness" Miscalleaneous reasons can now be accessed through " Cancellation Patients by Speciality"

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
Hospitals LFD (Learning from Death) Reviews:  • 97% reported. The target continues to be exceeded, as it has every month since February 2023.	Hospitals LFD (Learning from Death) Reviews:  • The current approach appears successful.	Hospitals LFD (Learning from Death) Reviews:  • There is reasonable confidence that the challenges experienced last reporting year have been overcome and significant progress has been made.
·		
		Note -
		Benchmarks are the Manx Care monthly average for 2022/23.

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
	Nutrition & Hydration:  • Missing assessments were brought to the attention of ward staff at the time of audit with several resolved at the time.	Nutrition & Hydration:  This will continue to be monitored and reported upon. Confident in positive performance.
		Note - Benchmarks are the Manx Care monthly averages for 2022/23.

#### **Wellbeing Services:**

- The goal of integrated care is to reduce reliance on ED in the long term. Attendance will naturally fluctuate throughout the year due to seasonal variation.
- Significant Covid impact where ED attendances artificially lower for that period, as people were discouraged from attending ED. Also an increase in admissions across the Isle of Man, as patients' conditions during that period were not being addressed in as timely a manner and have become more acute.
- Patients may be attending A&E due to capacity in community services, e.g. dementia patient unable to access Community Occupational Therapy services, falling and attending A&E.
- Concern re: metric with data collected on short term basis (6 months), and difficulty in evidencing the direct contribution of the service on ED and Hospital attendance as there are many factors contributing to the demand for those services that are outside the scope and control of the Wellbeing service.

#### Planned / Mitigation Actions

#### **Wellbeing Services:**

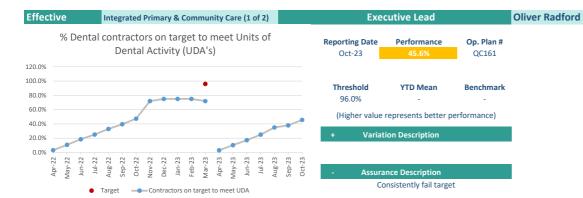

- The service is raising awareness regarding the impact the lack of capacity in community services has on ED.
- New frailty service identifying patients at an earlier stage.
- · Targeting of nursing homes specifically for falls.

#### Assurance / Recovery Trajectory

#### Wellbeing Services:

- The service will look to refer more patients to third sector services, e.g. respite services as appropriate.
- Technical specification of these metrics have been reviewed. Will move to a 12 month timescale to ensure a more appropriate indication of the service's performance, and to better evidence the direct impact of the Wellbeing service on ED and hospital demand.
- The PIMS team are working with the Wellbeing leads to produce a schedule of alternative KPIs that better reflect and evaluate the performance and impact of the Wellbeing Partnerships.
- Impact of frailty service is being reviewed.

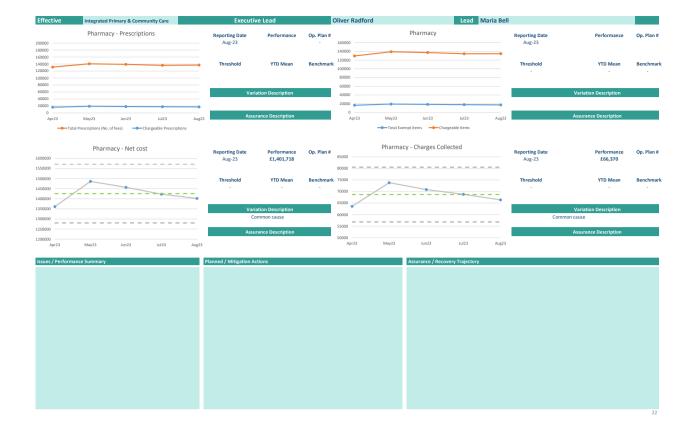

Note -

#### Issues / Performance Summary Planned / Mitigation Actions Assurance / Recovery Trajectory **Dental Contractors: Dental Contractors: Dental Contractors:** • 1 contractor will return their contract to Manx Care as of the 30th November • The majority of contractors are on target of 30% deliver for mid-year. Mid-year • Contractors who are not on target to deliver their contract may have their contract reduced in year; reviews are currently being undertaken and up date will be provided following this. 2023. This will become a salaried practice as of 1st December work is underway to any under-achievements above 96% will be paid back in full to Manx Care at year and a discussion will ensure the smooth transition of patient care. then be had with contractors in relation to reviewing their UDA target for the following financial year. Benchmarks are the Manx Care monthly averages for 2022/23.

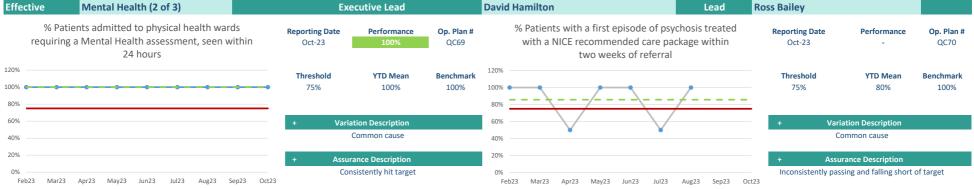

**Annmarie Cubbon** 

Lead

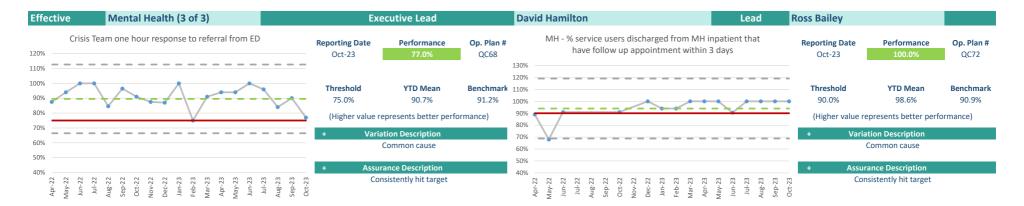

#### Issues / Performance Summary Planned / Mitigation Actions **Assurance / Recovery Trajectory** Average Length of Stay (ALOS): Continue to monitor and report against recognised NHSE standards. Average Length of Stay (ALOS): • ALOS for those discharged in October has decreased. The average length • The service regularly monitor patients who are admitted and actively look to progress the most appropriate of stay for those dicsharged from Harbour Suite 8 days. treatment/care plan on an individual basis. • For current inpatients, the ALOS has increased to a high for this reporting year and we will monitor to be assured individual patients are receiving Number of patients aged 18-64 with a length of stay - > 60 days appropriate treatment/care plans and for any barriers that might prevent Number of patients aged 65+ with a length of stay - > 90 days this. UK report this as a rate per 100,000 of the population at 8.0 (based on a rolling quarter). Our achievement against these metrics is higher than the UK for this calendar year to date. NHSE recognised standard measures are as follows:\_ Number of patients aged 18-64 with a length of stay - > 60 days; Oct = 0 Number of patients aged 65+ with a length of stay - > 90 days; Oct = 0 Note Benchmarks are the Manx Care monthly averages for 2022/23.

# Patients Admitted to Physical Health Wards: All patients requiring a Mental Health Assessment have continued to receive them within 24 hours, Longest response time 1 hour 35 minutes. First Episode of Psychosis Treated with NICE care package: No referrals for first episode psychosis during September. Planned / Mitigation Actions First Episode of Psychosis Treated with NICE care package: The existing mandate descriptor is inconsistent with NHS England measure of performance of early intervention in psychosis. IMHS are working with the performance management team to discuss the validity of this indicator in its current format and the potential move to a more appropriate alternative. No referrals for first episode psychosis during September. Patients Admitted to Physical Health Wards: The existing mandate descriptor is inconsistent with NHS England measure of performance of early intervention in psychosis. IMHS are working with the performance management team to discuss the validity of this indicator in its current format and the potential move to a more appropriate alternative. Note Benchmarks are the Manx Care monthly averages for 2022/23.

## Issues / Performance Summary Crisis Team:

• Decrease in Target performance noted to 77% although this is still above the target of 75%, we have seen a decrease of 12% in performance this month. Increased workload and night time referrals (less staff available) have impacted on response times. Crisis team 24 hour response to referrals from other wards at Nobles hospital was 100%. The longest response time was 1 hour 35 minutes.

#### 3 Day follow up:

• Excellent results - 100% compliant; all 72 hour follows were completed within the time frame and documented within the patient record in RIO.

#### Planned / Mitigation Actions

#### **Crisis Team:**

To continue to monitor response times monthly.

#### 3 Day follow up:

Reminders have been sent to operational managers as RiO documentation is note to not always be completed at the time of the event, meaning our dashboard may not reflect actual compliance.

#### Assurance / Recovery Trajectory

#### Crisis Team:

• Target continues to be achieved monthly and service area is motivated to achieve 100% compliance.

#### 3 Day follow up:

There is confidence that this target will be effectively maintained.

Note -

#### Referrals:

The number of new referrals received in October increased to 91

#### Re-Referrals:

 $\bullet$  We have significantly reduced our re-referral rate to 3.3% in October, which is slightly lower than the beginning of last quarter (4.5%).

#### Assessments completed within Timescales:

• The completion of Wellbeing Partnership assessments in October recent months, partic remained below the required threshold. A number of these assessments are complex, particularly in respect of Learning Disabilities.

#### Individuals receiving copy of Assessment:

• It is positive to note the return of the assessment sharing level to 100% during October.

#### Planned / Mitigation Actions

#### Assessments completed within timescales:-

An issue with the dashboard pull-through has been identified, where the first referral date keeps being referred to as the starting point for any reassessments. This means that the dashboard is incorrectly showing some assessments taking months or even years, where a service user has been assessed and re-assessed over a long period of time.

The focus of Adult Social Work in recent months has been to improve the rate of assessment sharing, which continues to be a positive area. Waiting list volumes have been reduced in recent months, particularly within the Older Peoples Community Team (a reduction of 90 down to approx. 25).

There has been some sickness absence within Adult Social Work which has affected completion of assessments, a number of staff have recently been supported back to work. The completion of assessments in Learning Disabilities within 4 weeks isn't realistic due to the complexities and input of other professionals being required. Conversations have started around changing this metric to 6 weeks in the next financial year.

#### Assurance / Recovery Trajectory

#### Assessments completed within Timescales:

• The data capture issue around assessments is still being worked through in conjunction with the BI Team. We are hoping to see a fix implemented and subsequent improvement in numbers by the December IPR. This will be influenced by the Learning Disabilities Team, who are seeing an increased caseload both in terms of numbers and complexity of client needs.

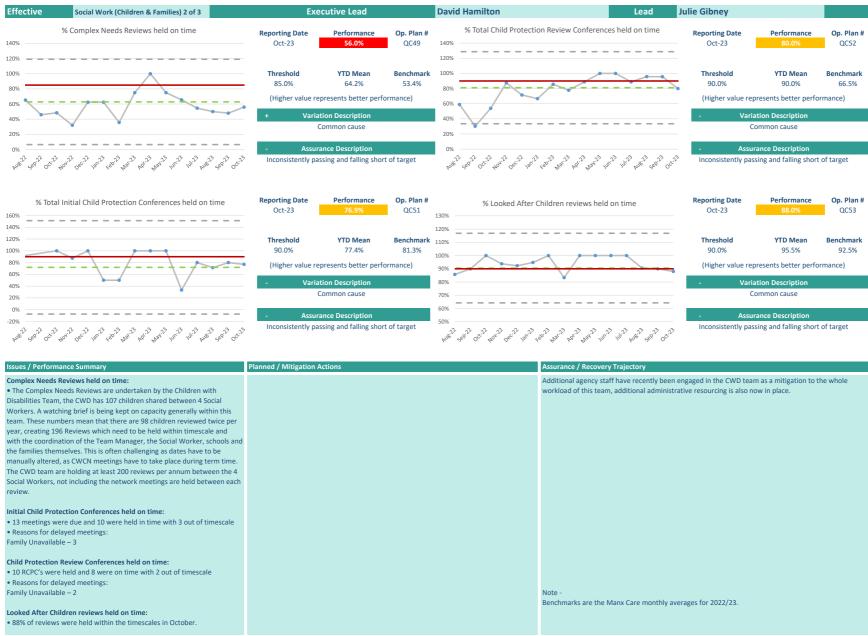

#### lote -

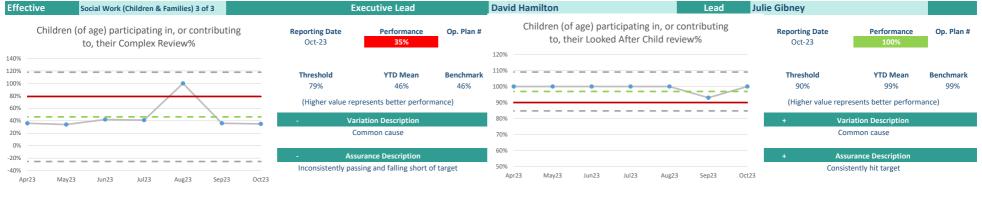

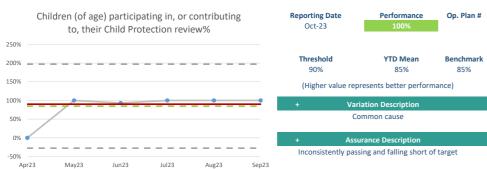

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
Referrals: Referral levels have remained fairly static over this reporting year.		Referrals:  Work is ongoing with the Business Intelligence Team to develop the underpinning data to enable the reporting of Re-Referral rates for the C&F Service in future months.
		Note - Benchmarks are the Manx Care monthly averages for 2022/23.

Lead

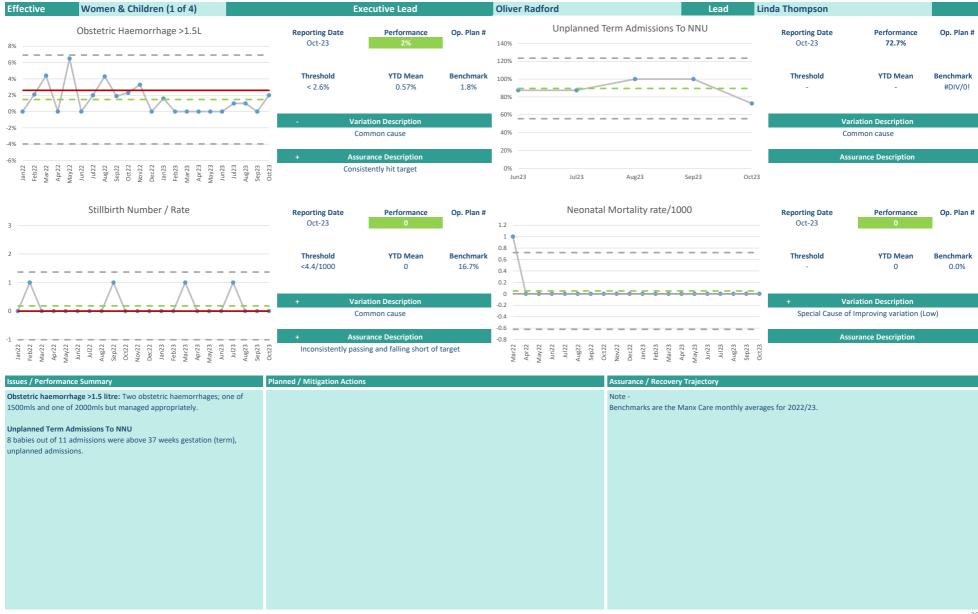

Julie Gibney

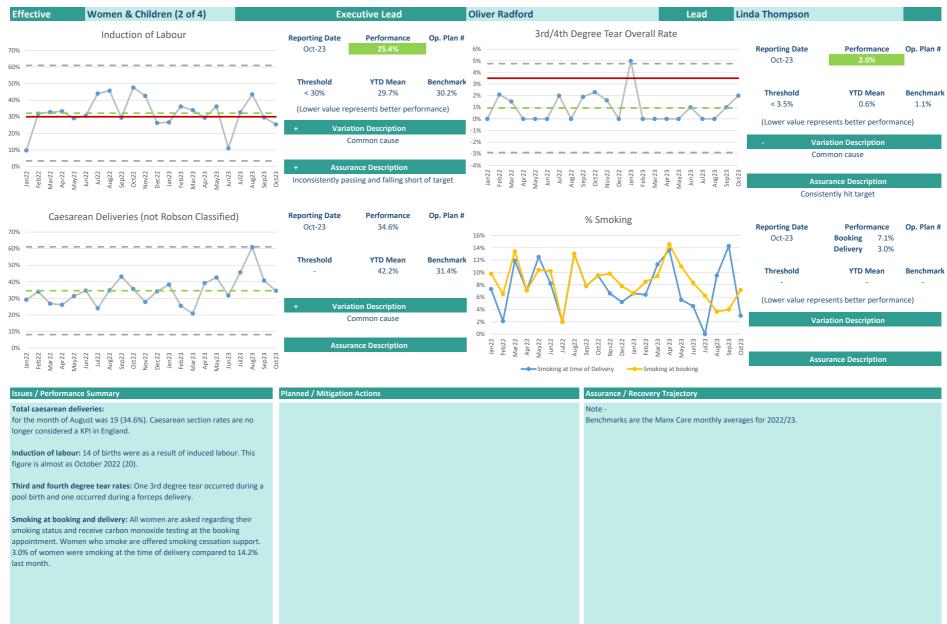

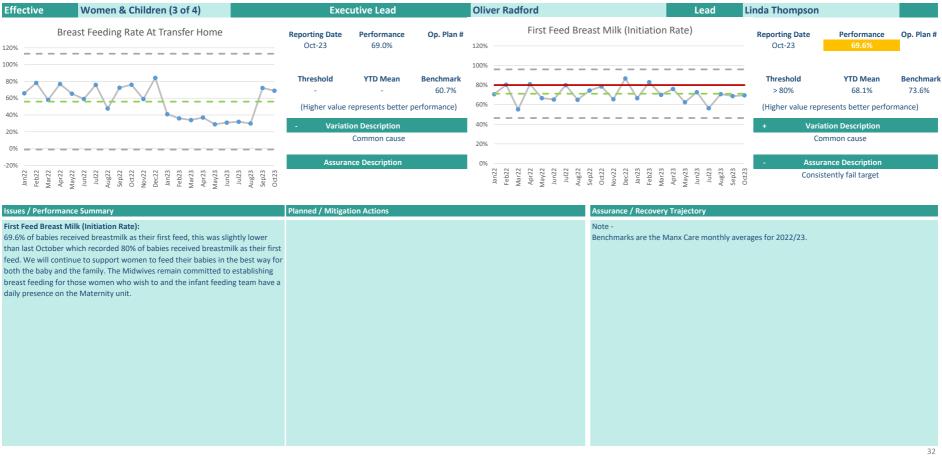

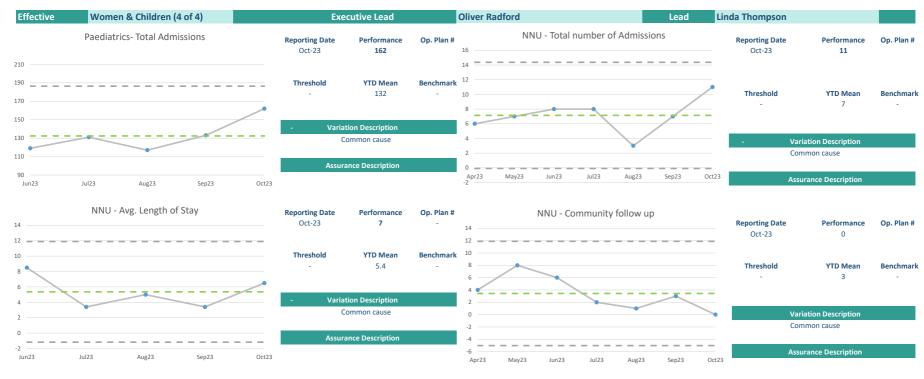

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
Participation in conferences for Looked After Children has a designated worker to encourage and develop participation, and therefore this metric is usually high. There is no specific role to provide this in CWCN and work continues to develop participation in this area, especially in the CWD team.	Engagement by children is encouraged, however this does not guarantee engagement as there is choice by the children involved. 11 meetings were held out of timescale for a variety of reasons, which is contributing to this low number.	Please see page 28 for supporting narrative.
		Note - Benchmarks are the Manx Care monthly averages for 2022/23.

In October 2023 the Neonatal Unit admitted 11 Babies and discharged 4 babies.

- 8 babies were above 37 weeks gestation (term), unplanned admissions.
- $\bullet$  1 baby was admitted following preterm delivery at 33/40 requiring NCPAP for 3/7
- 2 babies were repatriated for ongoing care (1x preterm, 1x term baby)
   All babies were admitted from the postnatal ward were between 3.25 hrs
- All babies were admitted from the postnatal ward were between 3.25 hrs and 17hrs of age.
- Babies from theatre/delivery ward were admitted 13-30 minutes of age.
- 7 x babies were admitted with respiratory symptoms requiring monitoring, antibiotic therapy/iv fluids/ supplemental oxygen.
- 1 x baby scheduled for delivery in tertiary centre, due to diagnosis, but born on the Island preterm @ 34/40, requiring intensive care and time critical transfer out of hours with local transfer team to UK.
- 1 x preterm admitted requiring NCPAP.
- Staffing stretched with 2WTE sickness. Staff working extra hours to fill gaps.
- Band 6 neonatal nurse interview successful, going through HR process.

#### Planned / Mitigation Actions

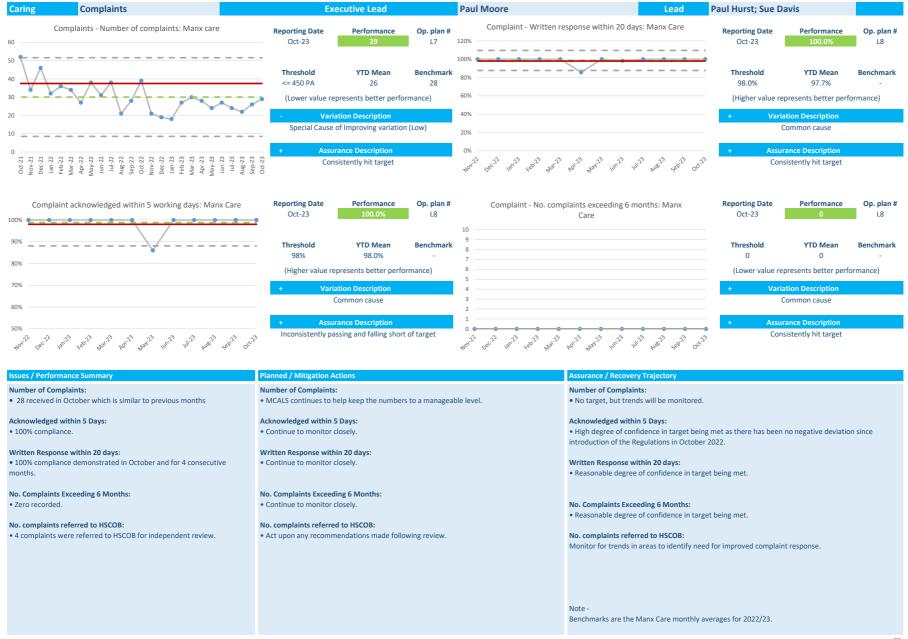

- The Neonatal Unit is ready to admit any sick/preterm neonate, when capacity allows.
- Regular communication between maternity and Neonatal Unit when capacity is a concern, with daily or more frequent huddles to plan/mitigate.
- Northwest neonatal Network aware of capacity issues, offering support & advice. Embrace available to support transfer process when necessary.
- Neonatal nurse transfer team now increased to two trained staff. An on call rota is
  managed to enable that a nurse is available as often as possible during the hours of
  07.45-20.15hrs. All transfers outside these hours are managed on a case by case basis.
- The Neonatal Unit nursing team take part in the on call rota to provide support at high acuity times, although this isn't consistently filled due to reduced staffing levels (staff already doing extras as well as on calls).

#### Assurance / Recovery Trajectory

All neonates will be cared for with the appropriate level of care as soon as practicable, and transferred to a Level 3 center as soon as possible if required for ongoing care.

Note

#### FFT Total number of responses:

• A total of 1,852 surveys completed for October 2023. (Increase of 665 surveys (36%) compared to September 2023). 8762 surveys completed YTD.

- FFT Experience was very good or good: 1,682 completed surveys rated experience as Very Good or Good equating to 91% against a target of 80%. Target exceeded for every month YTD.
- FFT Experience was neither good or poor: 66 completed surveys rated experience as Neither Good nor Poor equating to 4% against a target of 10% or less. Again, performance fort the year remains strong.
- FFT Experience was poor or very poor: 102 completed surveys rated experience as Poor or Very Poor, equating to 5% against a target of 10% or less. Again, performance fort the year remains strong.

#### Planned / Mitigation Actions

#### FFT Total number of responses:

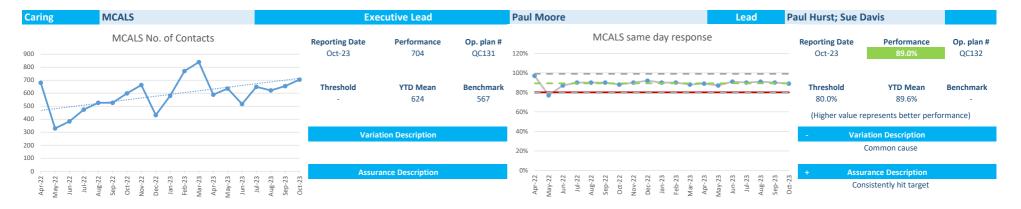

- Continue to promote / encourage feedback outpatient departments and GP Practices continue to deliver consistent feedback via the survey uptake from inpatient settings is still relatively low by comparison and work continues to promote engagement with teams and senior nursing leads to encourage feedback via the survey (Walk the Wards programme commenced on the 27 October 2023. Active recruitment of public reps to support inpatients to take surveys at the bedside with first reps due to commence end of November 2023.
- FFT Experience was very good or good: Experience and Engagement Team, MCALS and service leads to continue to encourage and promote engagement with the survey.
- FFT Experience was neither good or poor: Experience and Engagement Team, MCALS and service leads to continue to encourage and promote engagement with the survey. Monthly dashboards are reported to the Care Group Triumvirates with both Positive and Negative trends reported for the last month.
- FFT Experience was poor or very poor: Consistently achieving under the 10% target which is a positive indicator

#### Assurance / Recovery Trajectory

#### FFT Total number of responses:

- Experience and Engagement Team continue to conduct monthly walk rounds of the wards to collect surveys and speak to staff to encourage completion of surveys at discharge. Pre-paid envelopes are available to provide to service users who are inpatients and post boxes are accessible on all wards and outpatient departments including Primary Care based practices. There is a reasonable degree of confidence in increasing survey returns.
- FFT Experience was very good or good: Reasonable degree of confidence that reporting targets will continue to be met.
- FFT Experience was neither good or poor: Reasonable degree of confidence that reporting targets will continue to be met.
- FFT Experience was poor or very poor: Monthly dashboards and quarterly review meetings with all care group triumvirates are held to report feedback. Poor feedback is reported in the themes and trends as well as the anonymous commentary and care groups develop action plans within their governance groups to target poor feedback. Trends are monitored monthly via dashboards for care groups and drilled down further to team level to highlight positive and negative themes.

Note -

# **Number of Contacts:**

 704 contacts received in October 2023, demonstrating an increase of 49 contacts (7%) compared to September 2023. In person contacts have increased to 122 contacts in October due to proactively seeking feedback in the community during drop in sessions across the island.

# Same Day Response:

• In October, MCALS had resolved all contacts within 24 hours 89% of the time against a Key Line of Enquiry Target of 80%.

# Planned / Mitigation Actions

• MCALS will continue to provide excellent support in ensuring that where possible service user issues are addressed.

# Same Day Response:

**Number of Contacts:** 

• MCALS will continue to provide excellent support in ensuring that where possible service user issues are addressed as promptly as possible.

# Assurance / Recovery Trajectory

• Continued good performance in dealing with service user contacts and confident this will continue.

# Same Day Response:

**Number of Contacts:** 

• Continued good performance in dealing with service user contacts.

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
Referrals for First Outpatient Appointment: Referral levels for Consultant led services have remained at a high level into 2023/24. The number of referrals received in September (3041) was about 3.5% higher than the number received in October'22.		
Elective and Non Elective Admissions: Elective Admissions have slightly increased by approximately 7.7% in October (962) against September (893)		
Non Elective admission numbers have also slightly increased to 840 in October compared to 787 last month.		
		Note - Benchmarks are the Manx Care monthly averages for 2022/23.
		40

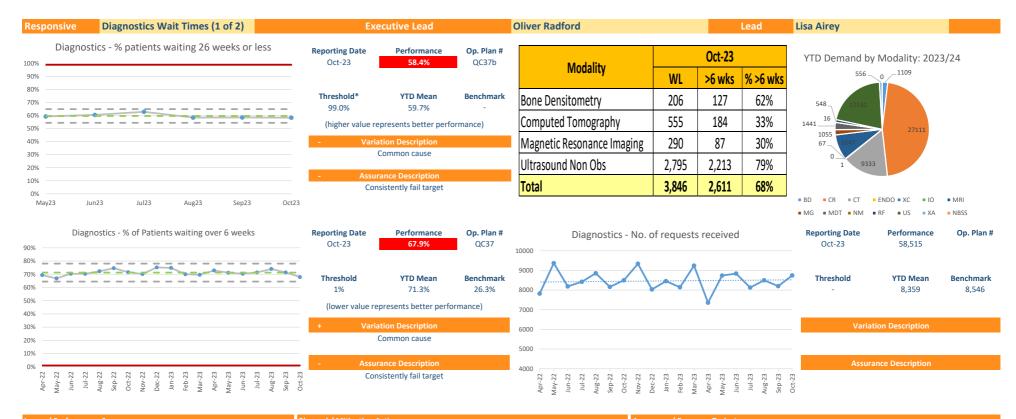

- · Reduction in outpatient clinic capacity due to
- Staff vacancies, annual leave and other absences.
- Difficulties in recruiting locum cover
- Ensuring prioritisation of doctor resource for 24/7 on call cover, inpatient, theatre and endoscopy activity.
- Following the ease on Covid restrictions, GP practices have been seeing more patients face to face which has led to an overall increase in referrals.
- Many outpatient pathways require considerable diagnostic intervention to enable their progression.

- R&R delivery (Nov'21 to Oct '23); 2,150 Ophthalmology procs in total; 62 Orth procs in Oct (870 in total); 48 GSU procs in Oct (358 in total); Other surgical specialties - 54 in total; 510 ENT • Recovery of ENT waiting times from November with the start of weekend clinics. OP attendances in total; Radiology - 140 scans in Oct; 22 CT, 118 US (998 in total); Mental Health - 13 referrals (262 in total)
- o Overall there has been about an 77% reduction in the Ophth DC waiting list.
- o Overall there's been about a 40% reduction in orthopaedic DC/IP waiting lists.
- o Overall there's been about a 33% reduction in the General Surgery DC/IP waiting lists.
- Dedicated waiting list validation team established and programme of waiting list validation commenced in October '22. To date over 17,500 referrals have been through technical validation and over 9,000 letters have been sent to patients checking if they still require to be on the waiting list. Based on the outcomes of the validation to date, there will have been a 14% reduction in the outpatient waiting list. No patient is removed from the waiting list without clinical oversight.
- ENT recovery plan commenced in November, including weekend outpatient clinics.
- Addition diagnostic capacity has been commissioned for approximately 1,300 scans (Echocardiograms, Cardiac Computed Tomography and Ultrasound) to improve outpatient
- Ward 12 has provided additional bed capacity to Urology, Gynaecology and ENT elective
- Restoration & Recovery (R&R) Phase 3 Business Case has been developed which includes modelling of demand, capacity and sustainability of outpatient services and waiting lists across 10 specialties. This is being expanded to cover all specialties.

- General Surgery R&R activity commenced in November '22.
- · Enhanced Waiting List Management programme established to implement procedural and operational improvements to embed Access policy and improve waiting list management. This includes:
- Waiting List Validation; started in October '22.
- Patient Tracking List (PTL) meetings (non Cancer);
- Referral & Booking (initial focus on partial booking and patient initiated follow ups)
- Referral To Treatment (RTT) Rules and System implementation;
- Reducing patient Did Not Attend (DNA) rates;
- Harm Review

Benchmark for '% Urgent GP referrals seen for 1st Outpatient' is the Manx Care monthly average for 2022/23. The benchmarks for the OP, IP and DC waiting lists are currently the waiting list sizes in Apr '23. In future reporting the benchmark will be a comparison to UK waiting list sizes using the numbers waiting per 1,000 population.

- Overall demand continues to exceed capacity, with demand for services continuing to increase. Demand was 26.2% higher than capacity in October.
- Emergency Department (ED) 24.7%, Outpatient Department (OPD) 35% and General Practitioner (GP) 23.9% are the primary source of referrals. and there has been no significant change on the distribution compared to last month.

   Waiting list validation process impler diagnostic waiting list technical, admit
- Inpatient referrals(864) remain high and slightly more than September.
   This equates to 12.5% of all requests.
- 49.8% of exams were reported within 2 hours, 10.9% have taken 97 hours or longer which is a decrease on last month.
- Of the 6930 exams, 46.4% were turned around on the same day (0.6% decrease compared to last month) and, a further 36% in 1-28 days (slightly higher than last month).

### Planned / Mitigation Actions

- Projects ongoing to increase capacity to reduce waiting times further.
- Engagement continues with third parties under the Restoration & Recovery (R&R) programme Phase 1 with regard to delivery of an insourced option to address high Cardiac CT\_MRI and Ultrasound waiting times.
- Waiting list validation process implemented in October, validating all aspects of the diagnostic waiting list - technical, administrative and clinical validation.

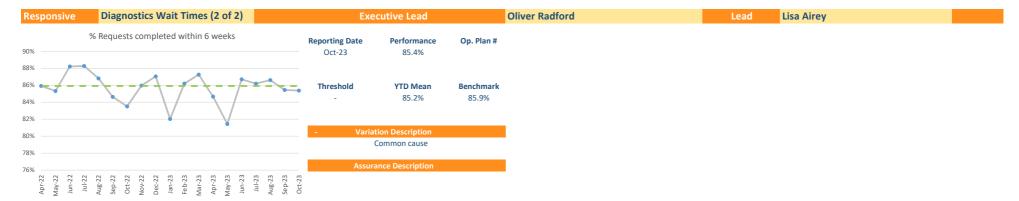

### Assurance / Recovery Trajectory

- Requirements for sustainable increased Radiology capacity being scoped as part of the demand & capacity element of the Phase 3 Restoration & Recovery (R&R) business case.
- \* Manx Care aspires to deliver a maximum six-week wait for all routine diagnostic tests; however, the baseline position identified that waiting times for routine diagnostics were significantly longer than six weeks. Therefore, Manx Care has committed to initially reduce the overall waiting list to a maximum of 26 weeks for the key modalities, with the development of credible, costed plans for reduction to a maximum of six weeks by the end of 2023/24.

Reporting of achievement against the 26 week threshold will be included in future reports.

### Note

Benchmark for '% Patients Waiting over 6 Weeks' is the UK NHSE performance figures for September 23. Benchmarks for '% Requests < 6 Weeks' and 'No. of requests received' are the Manx Care monthly average for 2022/23.

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
% Requests completed within 6 weeks:		
Approximately 85.4% of requests completed in Octoberber were undertaken		
within 6 weeks. This was slightly higher than the average of 85.2% for the		
year so far.		

- October's performance of 71% remained below the 95% threshold but slightly higher the UK's performance of 70.2%.
- Admitted Performance: 22.8%;
- Non Admitted Performance: 80.4%;
- Certain patient groups are managed actively in the department beyond 4 hours if it is in their clinical interest. This includes elderly patients at night, intoxicated patients, back pain requiring mobilisation etc.

In October, the average admission rate from Noble's ED of 22.3% was lower than that of the UK (28.4%).

### Performance due to:

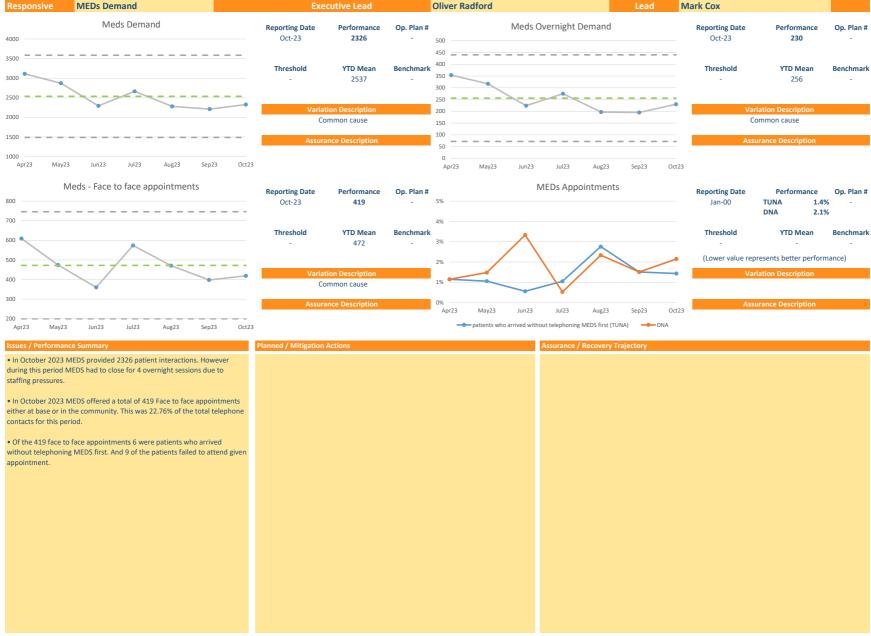

- Lack of ED observation space (Clinical Decision Unit space)
- · Lack of physical space to see patients
- Lack of Ambulatory Emergency Care capability and capacity.
- Limited Same Day Emergency Care (SDEC) capability
- Delays in transfer of patients to in-patient wards due to a lack of available beds.
- Staffing availability (particularly nursing) and sickness.
- Elderly case mix.
- · Lack of organisational Pathways for example back pain , optician, DVT, dental

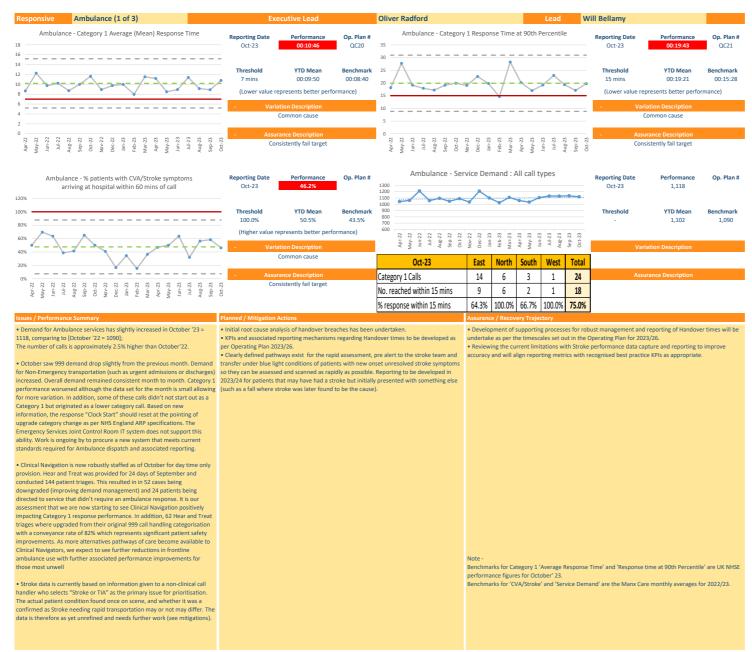

- New staff are being recruited to positions in ED, both doctors and nurses, however doctor positions are proving problamatic to fill, further engagement with HR recruiting and sourcing Teams to assist in this process.
- A business case for safer medical staffing is being completed.
- Further embedding of Ambulatory Emergency Care and MACU to divert patients away from the diversionary pathways away from ED and investment in community services. main ED department for practitioner led and ambulatory treatment that would normally require inpatient admission such as IV therapy or deep vein thrombosis treatment.
- . Work on accuracy of time stamps for triage and treatment at briefings.
- Development of Rapid Assessment by senior clinical staff
- Review of GIRFT Programme National Specialty Report (Emergency Medicine) and potential for alignment with current processes and metrics.
- Two current non-emergency workstreams should also contribute to the improvement of performance within ED:
- Work streams around time of discharge
- Other work streams around exit block

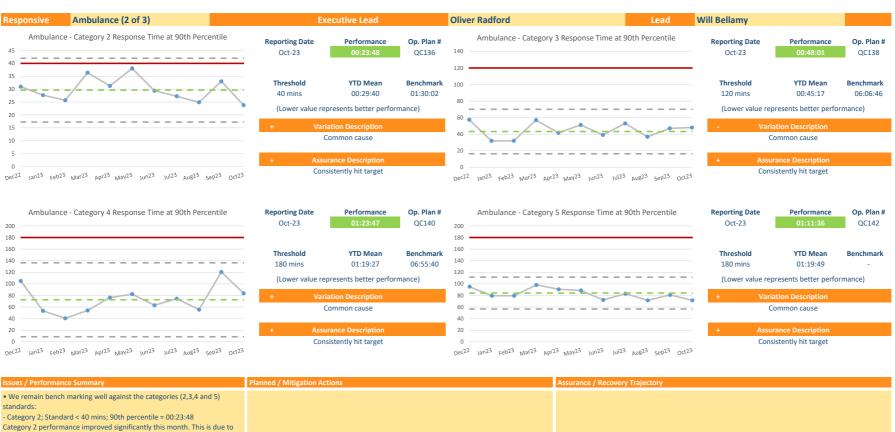

- Average total time in department remains within the required 360 minute standard.
- Expectation that performance will remain in line with the UK, but it should be noted that as expected the position has remained challenging over the period due to the additional seasonal pressures.
- Work is ongoing regarding the Healthcare Transformation Funding and the development of
- Development work continues regarding the establishment of the Ambulatory Assessment and Treatment Unit (AATU) service.
- Result of increase to Nursing Staffing availability and reducing sickness levels.
- ED recruitment still underway for 6 Band 6 nurses , 2 band 7 nurses , 2x Band 5 nurses, 2 Speciality Doctors ,2 consultants and 3 F3 positions. In addition to this 10 TSRs for agency nurses have been approved to bridge the gap for new recruits beginning in the dept.
- · Secured funding to make improvements to the infrastructure. In the planning stages at present.

Benchmarks for '4 Hour' and 'Admission Rate' are UK NHSE performance figures for September' 23. Benchmarks for 'Total Attendances' and 'Average time in ED' are the Manx Care monthly averages for 2022/23

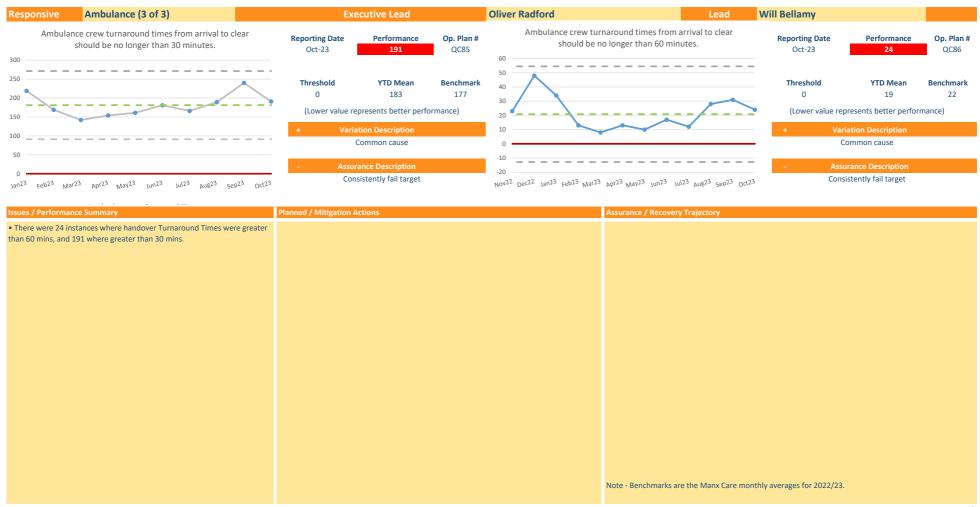

\*We remain bench marking well against the categories (2,3,4 and 5) standards:
\*Category 2; Standard < 40 mins; 90th percentile = 00:23:48
\*Category 2; Standard < 40 mins; 90th percentile = 00:23:48
\*Category 3; Standard < 210 mins; 90th percentile = 01:23:47
\*Category 3; Standard < 180 mins; 90th percentile = 01:11:36

\*Note 
Benchmarks for Category 2,3,4 'Response time at 90th Percentile' are UK NHSE performance figures for Septimber' 23.

Responsive Cancer Wait Times (1 of 3) Executive Lead Oliver Radford Lead Lisa Airey

Manx Care have moved to the new version of the National Cancer Waiting Time Guidance (version 12.0) from October 2023 (https://www.england.nhs.uk/wp-content/uploads/2023/08/PRN00654-national-cancer-waiting-times-monitoring-dataset-guidance-v12.pdf).

The IPR data has been aligned to the new reporting guidance from this month, with the reporting of the equivalent October 2023 data. Work is continuing with the Cheshire & Merseyside to understand future developments of the guidance and planning towards future expectations.

The new guidance has simplified the CWT reporting:

- 28 day FDS target 75% (Receipt of urgent referral for suspected cancer, receipt of urgent referral from a cancer screening programme (breast, bowel, cervical), and receipt of urgent referral of any patient with breast symptoms (where cancer not suspected), to the date the patient is informed of a diagnosis or ruling out of cancer)
- 62 day RTT target 85% (From receipt of an urgent GP (or other referrer) referral for urgent suspected cancer or breast symptomatic referral, or urgent screening referral or consultant upgrade to First Definitive Treatment of cancer)
- 31 day DTT target 96% (From Decision To Treat/Earliest Clinically Appropriate Date to Treatment of cancer)

Manx Care's reporting will be aligned to this guidance.

The new guidance has removed the reporting of the 2 Week Wait (2WW) however following feedback from Cheshire & Merseyside Cancer Alliance, this will continue to be monitored closely by our clinical and operational teams in order to support the acheivement of the Faster Diagnostic Standard.

# Faster Diagnosis Standard

The aim of this target is to:

- reduce the time between referral and diagnosis of cancer
- Beduce anxiety for patients, who will receive a diagnosis or an 'all clear' but do not currently receive this message in a timely manner
- work alongside the delivery of the 62-day referral to treatment cancer waiting times standard, including the standard to reduce waiting times, through improved analysis and pathway improvements of faster diagnosis.

The 28 day FDS gives a fuller indication of the first part of the suspected cancer pathway rather than using the 2WW performance alone. It reflects not only the first appointment, but also that the diagnostic work has been completed and most importantly that the patient has been informed of a cancer or non-cancer diagnosis.

# **Best Practice Timed Pathways**

The Best Practice Timed Pathways (BPTP) are being introduced for specific tumour groups. Best practice timed pathways support the ongoing improvement effort to shorten diagnosis pathways, reduce variation, improve people's experience of care, and meet the Faster Diagnosis Standard (FDS). It will also ensure consistency between Manx Care's pathways and that of the Cancer Alliance pathways. Further work is needed to align with the BPTP pathways from the UK NHS.

	Monthly number of				
**Tumour Group	Oct-23	12 month Avg.			
Breast symptomatic non-suspected	7	8			
cancer)					

\*Forecast is straight line 12ths only - based on actuals plus avg. referrals per month received Apr 23 - Mar 24.

\*\*Monthly referral figures for Breast Symptomatic are shown separately as the methodology for recording and reporting them changed in Oct 21, meaning that a YTD year on year comparison would not be appropriate.

Previously breast symptomatic were 'upgraded' but these are now reported on the Somerset Cancer Registry in line with the 'exhibited breast symptoms – cancer not suspected' category in line with UK reporting.

- The 28 Day standard was achieved in October, with performance at 75.3% against the 75% threshold. This positively reflects the impact to date with specialist teams – this should give better guidance to GPs of the ongoing remedial actions and is a significant achievement given the sustained high levels of demand.
- to be monitored at the Cancer PTLs to ensure timely access to first appointment and aid achievement of the 28 day target
- Continued high number of suspected cancer referrals across tumour groups is impacting on capacity.
- All suspected cancers continue to be monitored against Cancer Waiting Times (CWT) targets by operational PTL and tumour specific PTLs
- Delays to communication of diagnosis of non-cancer are being picked up via tumour specific PTLs (28 day FDS) and communication with MDT to stop • Further work needed on subsequent treatment tracking and data reporting the clock as soon as diagnosis is communicated.
- Volatility of percentages due to small numbers, especially for some targets

- Review of Suspected cancer GP proforma against new Cancer Alliance templates underway
- Continued roll out of tumour specific PTLs to ensure better communication between clinical/MDT staff over potential to breach CWT targets
- Although the 2 Week Wait standard is no longer reported, this continues Review of administration of referrals with PIC underway to streamline process and ensure days not lost in pathway ahead of first appointment being booked.
  - Draft Cancer Access Policy, Cancer Escalation Policy and Inter-hospital transfer and breach allocation SOP are shortly to be circulated for consultation. A number of the 62 day Referral to Treatment (RTT) breaches are due to the wait times at the UK specialist centres providing treatment, and as such are outside of Manx Care's control. These documents will support this process. They will also support better communication/escalation of possible breaches and identify root cause of any unavoidable breaches

  - Review of Cancer Services and resources underway further work needed to understand pathways against Cancer Alliance clinical pathways in addition.

- Reporting data now taken directly from the Somerset Cancer Registry and automated.
- KPIs and performance management governance brought in line with the National Cancer Waiting Times
- Monitoring Dataset Guidance and will adapt to new guidance from next month.
- Performance may be impacted by capacity issues currently being reported at Cancer Operational PTL due to lack of specialist staff within Breast team

Issues / Performance Summary	Planned / Mitigation Actions	Assurance / Recovery Trajectory
Please see page 50 for supporting narrative.		
Number of patients on a cancer pathway is based on the figure at the close of the month to give a guide to activity - the amount varies throughout the month		
The number of patients awaiting first appointment is based on the figure reported at the last Operational Cancer PTL of the month to give a guide to activity - the number waiting varies throughout the month		

# Assurance / Recovery Trajectory **Community Adult Therapy: Community Adult Therapy:** • 50% of Urgent 1 (3 working day) and 69.8% of Urgent 2 (5 working day) • Team have reviewed triage priorities and would like to simplify these to Priority 1 (10 day patients were seen within the required timescales in October. response), Priority 2 (30 day response), Priority 3 (60 day response) - this is to be taken to Care • The team hold heavy caseloads of patients with complex and changing Group Lead by Head of Therapies for discussion. This would reflect the service not being an needs requiring regular input and reviews making it more difficult to urgent/rapid response service, reduce the pressure on the team to focus on the urgent referrals respond to new referrals. and improve the response times to the other categories. • Staffing – currently 1 B7 Physiotherapist on sick leave (off all of the month • Bank OT currently supporting for approx. 26 hours a week. of September), existing cases have needed picking up. Also 1 x B7 fulltime • Part time OT within the team picking up additional hours as able. OT vacant (acting up as interim team lead), 1 x B6 0.6 OT vacant, and 1 x • TSR requests in place for 2 x B6 OT - no interest at present. B5/6 Rotational OT post vacant. • 0.6 OT post currently out to advert. • B5/6 Rotational post out to advert – currently 4/5 posts vacant with this to increase to 5/5 vacant from December. The post has been on a rolling advert throughout the year, 1 interview to be offered following last closing date. · Team completing waiting list reviews. Benchmark for '% patients seen by CAT' is the Manx Care monthly averages for 2022/23.

The number of GP appointments fluctuates each month and is dependent on capacity and demand. Demand is particularly high at the moment, especially with seasonal illnesses emerging.

DNA rates have been reducing, primarily due to the measures that the practices have put in place, but patients are still booking urgent on the day appointments and then failing to attend.

Days to next appointment for Snaefell are exceptionally high compared to other practices. Discussions held with the practice at their Q2 review in October indicated that they have recently registered a large number of South African patients who are presenting with multiple issues, bringing new challenges to the practice. There has also been staff holidays recently that they have not been able to cover with alternative clinicians.

### Planned / Mitigation Actions

Q2 Contract reviews are currently taking place and a review of all appointment data is being undertaken with a view to understanding any issues and to put plans in place to rectify areas of concern.

Use of EMIS / AccurX / website / email / phone are all ways patients have access for cancelling, appointments. The practices also write to repeat offenders.

Manx Care, Primary Care Services has employed 2 new salaried locum GP's, complementing the single one in employment, with another 2 due to commence next year. These additional staff will assist the practices when they have scheduled leave, as they can be booked in advance.

Practices with vacancies are currently recruiting

### Assurance / Recovery Trajector

Winter planning additional support / appointment to vacancies and additional salaried GP support will assist in improving capacity.

Practices utilise reminder texts to patients when an appointment is booked, 2 days before the appointment and a day before the appointment. Some patients can receive up to 5 texts in total to remind them of an upcoming appointment.

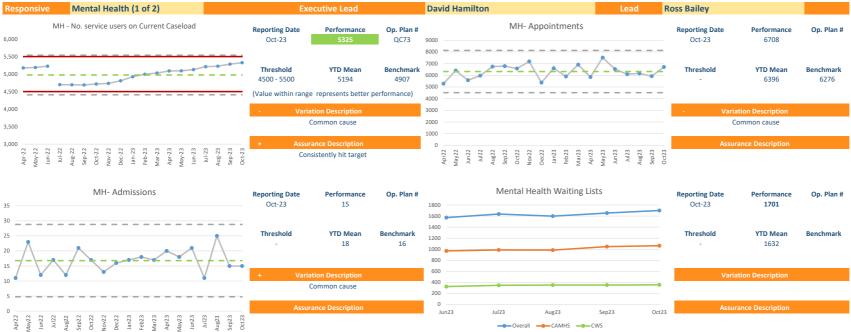

When all 5 Salaried GP's are in post this will assist practices with resilience and stability, complementing their existing establishment of staff. We also have the Winter planning assistance of 3 GP's into Primary Care to assist with capacity issues over the winter period.

Maternity bookings		
Gestation<10 weeks at booking: Gestation at booking continues to be a concern with only 33.9% of booked women booking before 10 weeks.		
<b>Booking:</b> A total of 56 women have booked for care in October same as in October 2022.		
		60

Issues / Performance Summary	Planned / Mitigation Actions	
Over the month of October there was <b>55 babies born</b>		With the establishment increasing as of September we expect all new birth visits to be conducted within timeframe where within our control.
New Birth Visits		
In October 2023 we received 62 Antenatal referrals into the department.		
We completed a total of 52 visits. Out of these visits, 47 were completed within the timeframe of 14 days and 5 were not completed on time.		
Exception Data 2 parents requested to reschedule and 1 infant was in a UK NNU.		
Breach Data 2 were completed after day 15, no reason provided.		
In October 42 women were assessed as Universal, 5 as Universal Plus and 1 as Universal Partnership Plus at their New Birth Visit.		

The vacancy factor across Older Peoples Services is largely attributable to recent announcements at Cummal Mooar where they currently have 7 vacant beds + 3 respite beds.

Southlands are carrying 4 vacancies but have 4 people on the waiting list. Dementia Care & Support Services have 4 vacancies and 5 people on the waiting list.

Therefore in reality where there are vacancies people are transitioning into those beds.

Across LD services 81 beds are available, of which:

- 67 are occupied (82.7%)
- 1 is due to be decommissioned once current service user transfers
- 14 are vacant (17.3%), of which 6 are currently unavailable due to challenges by existing service users (not 5 as stated) meaning;
- 7 beds (8.6%) are available

Of the 7 available beds, 4 are under active consideration:

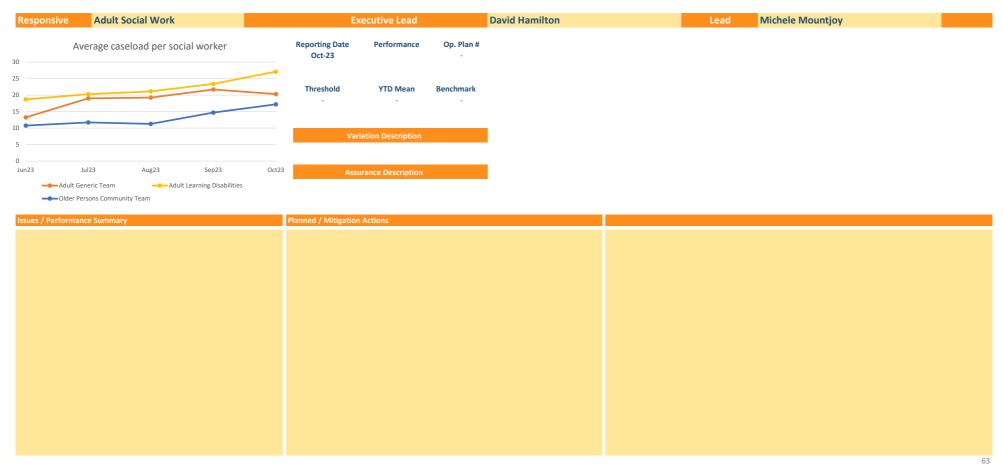

- 1 provisionally allocated
- 1 current assessment is in progress
- 2 cases are being actively explored

Therefore, actual net available LD residential capacity for new cases arising is 3 beds (3.7% of overall capacity).

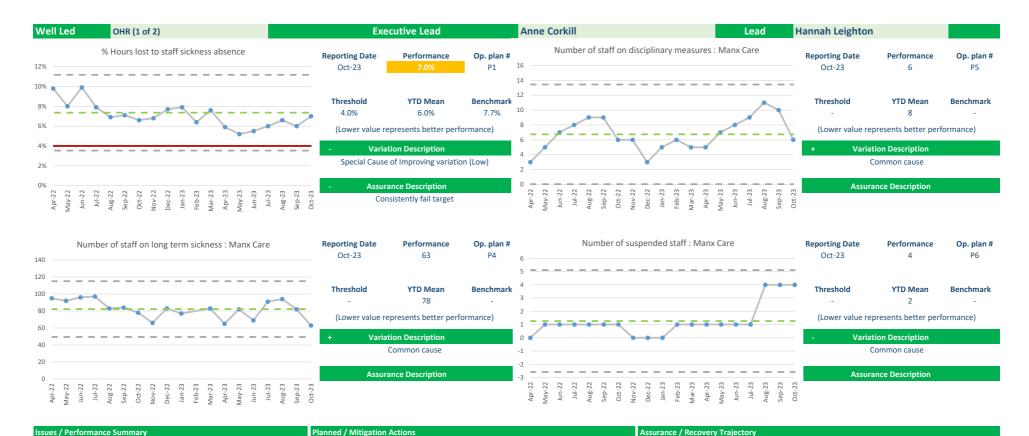

# Planned / Mitigation Actions

Decisions in regard to the future use of Cummal Mooar will help provide additional certainty. Decisions in regard to Summerhill View and the part or full commissioning of that service will support a more stable position.

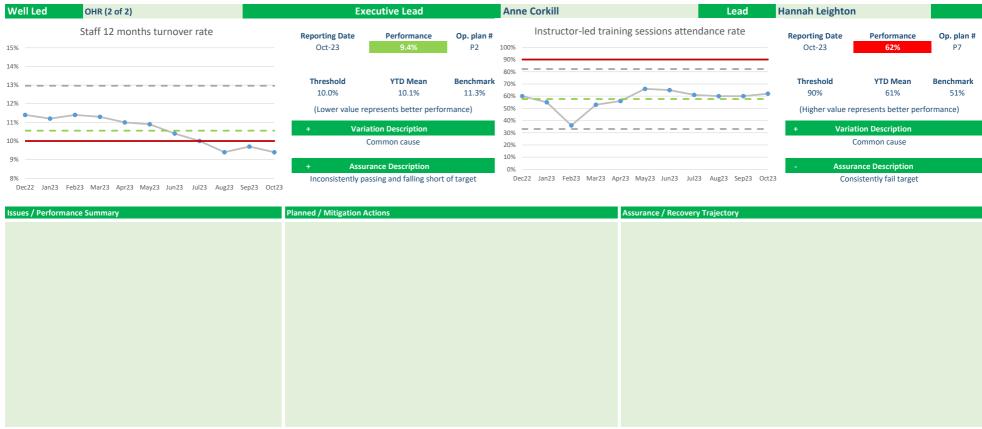

Business cases are pending in regard to LD services which if approved, will support increased capacity.

# Planned / Mitigation Actions

- For the past year Manx Care has reported all incidents reported to the Information was done as part of the remediation plan agreed with the Commissioner. Following a recent to report ensures that Manx Care is continuously reviewing and strengthening the way the meeting with the interim Information Commissioner it has been agreed that Manx Care can organisation manages and secures data subjects' information. move to a position of only reporting to the ICO the breaches which are required to be reported under GDPR. However, Manx Care will continue to maintain a detailed breach log, • There is a continued upward trend in the number of DSAR and FOI requests being received by Manx continue to work with the IG Risk and Quality Assurance Manager to ensure any improvements and remedial actions identified are progressed. In October Manx Care had 14 breaches, but only 4 met the criteria of being reportable to the ICO.
- Where a data breach occurs Manx Care will inform the data subject(s) unless there is a clinical reason not to do so or if there is a very low risk to the data subject, for example patient data being shared with the incorrect GP

# Assurance / Recovery Trajectory

- Manx Care staff are actively encouraged to report any data breach, or suspected breach, to the Governance team as breaches to the Information Commissioner. This has resulted in Manx 
  Manx Care DPO. Staff reporting breaches to the Manx Care DPO is a positive reflection of the Care reporting non breaches and breaches which did not require the ICO to be informed, but awareness amongst staff of the responsibility for good information governance. Willingness by staff
- conduct full internal investigations with the relevant service areas for all breaches, and will Care. The Information Governance team continues to face a significant challenge in responding to these requests within the legal timeframes. Longer term this pressure is likely to remain high.

WF009		Actual performance against Budget	Sep-23		-2,866	-£4,401	-£13,730	-		

# % Progress towards Cost Improvement Target (CIP):

• The CIP plan was also reviewed in September and expected cash out savings have been revised from £9.6m to £6.6m. This has resulted in the expected overspend worsening by (£2.0m) as a central assumption was included in the forecast for additional savings that could be achieved by the end of the financial year (over what has already been realised). This assumption was flagged as a medium risk of £3.3m in last month's report and due to this review, £2.0m of this has now been included in the forecast. There still remains a risk of £1.2m relating to assumptions around

 Spend is expected to increase by £27.4m compared to the prior year, whilst funding has increased by just £20m creating a gap of £7.4m. The year-end position for 22/23 was an overspend of £8.9m which also contributes to the predicted operational overspend of £17.9m. Appendix 1 forecast. £592k in efficiencies have also been delivered but these compares spend by Care Group in 22/23 against projected spend for 23/24 do not impact the forecast. and includes narrative explaining the spend movement from £305.8m in 22/23 to £333.1m in 23/24.

# Total income (£):

 The operational result for September is an overspend of (£1.8m) with costs reducing by £0.9m compared to the previous month. This reduction bank is also being used as a less expensive alternative to agency to cover was mainly due to Tertiary costs as the August result included an £0.8m increase to bring the actuals in line with activity. The actuals for this month are now in line with the expected trend which is higher than previously reported.

•Due to a change in the expected levels of Tertiary activity and a review of the CIP plan the full year forecast overspend has increased by (£3.0m) to (£30.2m).

### Total staff costs (£):

• YTD employee costs are (£2.8m) over budget. Agency spend is contributing to this overspend and reducing this is a factor in improving the financial position by the year end. The total spend YTD of £6.2m is broken down across Care Groups below. The Care Groups with the largest spend are Medicine (£1.3m), Social Care (£1.0m) and Women & Children (£0.8m), where spend is primarily incurred to cover existing vacancies in those areas.

# % Progress towards Cost Improvement Target (CIP):

further financial mitigations would be required to manage the financial position if these

is due to activity & invoice timing. Actuals and the forecast for this project are closely monitored to ensure that the programme will be delivered within the

# funding allocated. Total income (£):

• The forecast includes £4.9m of cost which is expected to be approved from the DHSC reserve fund which would reduce this to (£25.2m).

• To date, £3.4m in cash out savings have been delivered, which have been reflected in the • Of the forecast overspend, £7.2m relates to a cost pressure for the 23/24 pay award above 2%. The

# Total staff costs (proportion %):

 Although agency costs are continuing to reduce bank costs are increasing which means that overall costs are tracking slightly higher than last year but within expected trends. Bank rates have inceased this year which is partly contributing to the rising cost but vacancies and gaps in rotas.

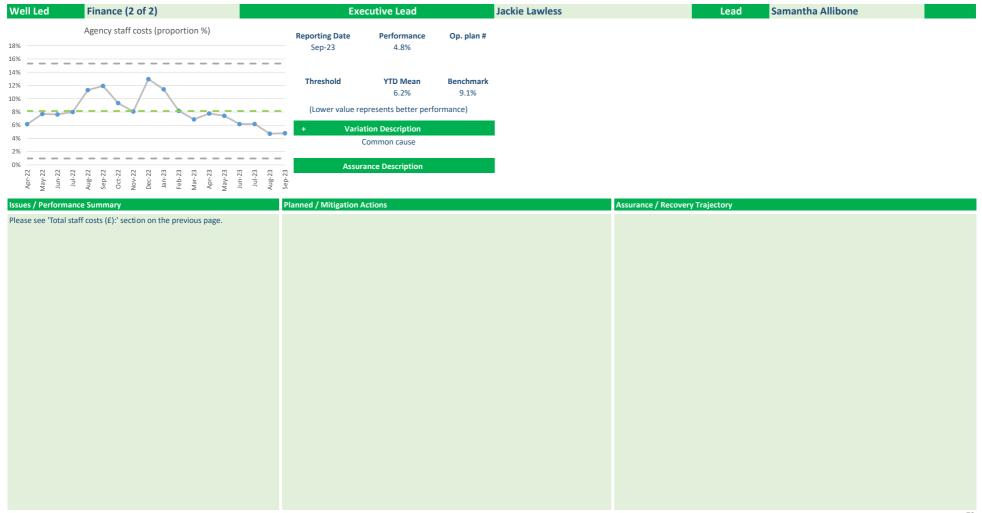

# % Progress towards Cost Improvement Target (CIP):

• There are potential risks of up to £2.9m that could affect the current reported forecast & • As CIP plans are implemented the forecast is being adjusted by Care Group to reflect the actual spend reductions achieved, however as not all CIP workstreams impact the run rate there are remaining savings of £1.2m included in the forecast centrally. If the remaining CIP savings cannot be • The Restoration & Recovery programme is showing an overspend on a YTD basis but this achieved in year or do not impact the forecast run rate then this would increase the expected overspend for Manx Care. Due to being half way through the financial year this is now included as a significant risk to the forecast, meaning that if the savings are not delivered then the forecast overspend will increase to (£31.4m).

## Total income (£):

budget allocated to Manx Care includes funding for 2% but the financial assumption for the forecast (and in line with the planning guidance received from Treasury) is that the pay award should be

For reporting purposes a provision of 2% is included in the Care Groups actuals & forecast with the remaining 4% accounted for centrally.
