

PETROL AND DIESEL WEEKLY PRICE MONITORING

Date of Publication: 08 March 2024

Notes:

- 1 E10 fuel which is 90% petrol and 10% ethanol was introduced in UK forecourts in 2021. The IOM has continued using premium petrol, which is free of ethanol. Therefore the two products are not exactly like for like.
- 2 Both Isle of Man and UK prices are collected weekly.
- 3 Isle of Man prices are the average pump prices observed at a subset of Manx Petroleum and Ellan Vannin Fuels forecourts.
- 4 UK prices are average pump prices observed at around 3,500 independent dealer sites (i.e. excluding supermarkets). The source of this information is Experian Catalist.
- 5 Contained within Experian's average price is a small number of prices from the Inner and Outer Hebrides, the Northern Isles and the Islands of the Firth of Clyde. These areas benefit from a 5 pence per litre fuel duty relief.
- 6 All figures shown are in pence per litre.
- 7 As fuel duty and VAT make up a significant proportion of the forecourt fuel price, a schedule of prices excluding all duty and VAT is included in addition to one detailing full retail prices.
- 8 Isle of Man fuel outlets receive fuel shipments on a much less frequent basis than outlets in the UK. UK forecourt prices therefore tend to react quickly to any change in wholesale price, whereas it can take several weeks before wholesale price changes are reflected in retail prices in the Isle of Man. To better illustrate price trends, the OFT therefore reports retail prices as a rolling average as well as actual pump prices observed.
*A Barrel of Oil is a term used in this report. One barrel contains 42 gallons of crude oil.
- 9 Isle of Man and UK duty and VAT rates are the same for oil and fuel products. VAT is 20% and the duty rates are stated below.
- 10 This information may not be used for advertising purposes without prior agreement from the OFT.
