INTRODUCTION

This is the twenty-fifth annual report of the Isle of Man Passenger Survey, containing details of various aspects of passenger traffic to and from the Island in 2009.

The survey has been running continuously since 1985 and provides estimates of the structure of passenger traffic, the numbers and spending of each type of visitor, and trends in these variables over time.

Since its inception the survey has been conducted by staff of the Economic Affairs Division of the Isle of Man Government Treasury, who interview departing passengers at Douglas Harbour and Ronaldsway Airport. Responses from these interviews are recorded electronically and analysed within the Division, with the results released in full report form on an annual basis.

In the Passenger Survey, interviewees are classified under the following definitions of passenger type:-

Passenger Type	Definition
Isle of Man Residents (RES)	Isle of Man residents leaving the Island.
Period Visitors in Paid Accommodation (PVPA)	Non-business visitors who stayed in paid accommodation whilst in the Island.
Period Visitors Visiting Friends and Relatives (VFR)	Non-business visitors who stayed with friends or relatives whilst in the Island.
Business Visitors (BV)	Visitors who were in the Island for business purposes.
Day Visitors (DV)	Non-business visitors who did not stay overnight.

The Report begins with an Executive Summary which outlines the most significant results for 2009. The results are then presented in detail by a series of tables and graphs. Finally, the technical aspects of the survey are explained, with a section on sample size, methodology and a copy of the survey questionnaire.

Throughout the Report, “quarterly” figures are presented in which “Q1” includes figures for January to April and “Q2” consists of those for May and June. This is to ensure that quarterly comparisons are not distorted by the timing of the Easter break.

This Report is intended to meet the general information requirements of regular users of the Passenger Survey, but additional statistics may be made available on request. Further comments and enquiries should be addressed to:

EXECUTIVE SUMMARY

The Structure of Passenger Traffic

Total scheduled passenger departures fell by 3.7% over the year, from 674,772 in 2008 to 649,576 in 2009. The number of passengers travelling by sea fell by 0.5%, but the bulk of the drop in passenger traffic was due to a reduction in the number of air passengers, which was down by 6.3%.

The number of trips off-Island by Isle of Man residents fell from 399,569 in 2008 to 362,452 during 2009, a fall of 9.3%, while the number of visits to the Island by non-residents rose from 275,203 to 287,124 over the same period.

Area of Residence/Destination

As always, the largest number of visitors came from the North West of England (34.1%). Other regions that provide a substantial share of the visitor total include South East England (16.3%) and the Midlands (11.5%). 5.9% came from outside the UK/Eire/Channel Islands.

The main destination for 35.4% of residents travelling off-Island was the North West of England. A further 21.2% were travelling to a destination outside the UK/Eire/Channel Islands.

Length of stay

The average length of stay of visitors (excluding day visitors) was 5.7 nights in 2009, whilst the average for residents travelling off-Island (again excluding those returning the same day) was 6.8 nights.

Expenditure

Estimated expenditure on trips to the Island made by visitors rose from £90.3 million in 2008 to £95.3 million in 2009. On average, visitors spent around £332 per visit.

APPENDIX 2. Notes on Survey Methodology

1. Up to 1997, Passenger Survey reports applied results from the survey to the overall number of scheduled arrivals, despite the fact that for reasons of practicality passengers are only interviewed on departure. Since 1997, the first year in which comprehensive and reliable data were available for departure figures, these have been used as the basis for analysis. This change, whilst ensuring greater accuracy, makes little difference to the overall results.
2. The information contained in this report relates only to scheduled departures. It does not include unscheduled departures such as some charter flights, cruise ship passengers and pleasure craft.
3. Some percentages have been rounded and so may not total 100 in every case.
4. Cases are selected using a complex sampling design. All results are re-weighted to account for the different numbers of passengers travelling by each route and mode of travel from the Island. The survey design also corrects for any bias which may otherwise be introduced by the different length of interview completed by different categories of passenger. As with any survey of this type, results are subject to random error variation.
5. Data are collected from departing passengers by way of interviewer-led schedule at Ronaldsway Airport and Douglas Harbour.
