RIVER QUALITY OBJECTIVES

**Agreed as Government Targets by The Department of Local
Government and the Environment on 4th July 2001**

The Department of Local Government and the Environment

*providing services in a way which reflects the need to protect and
enhance the environment of the Isle of Man for the benefit of all.*

RIVER QUALITY OBJECTIVES

Under Section 2 (1) of The Water Pollution Act 1993 the Environment Department (Department of Local Government and the Environment) *may* prescribe a system of classifying rivers and use this system to establish River Quality Objectives. Section 2 (4) of the same act requires a publication of the proposals and offers invitations for comment.

The publication and consultation process was carried out during 2000 comprising a number of presentations to government departments and conservation representatives.

A document detailing proposed objectives and timescales was distributed at the presentations, in addition it was posted on the Government Laboratory internet website and comments were requested by the end of 2000. As the timescale for consultations is now over and comments have been received it is now proposed to publish the River Quality Objectives based on the comments received.

The present river quality (1995-1999), future river quality objectives and relevant comments including timescales are presented in the following list and maps. Also included are the definitions of the objectives which, with the exception of aluminium and slight changes to the class descriptions, are the same as those used in the UK Environment Agency.

The objectives are given for specific river stretches situated between discrete sampling sites. Where present quality and objectives are the same between a number of river sites the individual river stretches are combined into longer stretches.

The agreed River Quality Objectives as presented should be used as guidance for catchment management, planning development and the setting of discharge licenses under sect. 5 (1) of The Water Pollution Act 1993, and would become statutory if approved by Tynwald.

River	Stretch	1995-1999 Quality	River Quality Objective	Comments
Middle River	Douglas to Oakhill	RE2	RE2	As existing
Middle River	Oakhill to Richmond Hill	RE3	RE3	As existing
Middle River	Richmond Hill to source	RE1	RE1	As existing
River Douglas	Pulrose to Dhoo/Glass confluence	RE2	RE2	As existing
River Dhoo	Douglas to Union Mills	RE2	RE2	As existing
River Dhoo	Union Mills to Glen Vine	RE1	RE1	As existing
River Dhoo	Glen Vine to Ellerslie	RE4	RE1	End 2003 on IRIS completion
River Dhoo	Ellerslie to source	RE1	RE1	As existing
River Glass	Douglas to Tromode	RE1	RE1	As existing
River Glass	Tromode to St.Georges Bridge	RE2	RE1	On closure of animal rendering plant
River Glass	St.Georges Bridge to rendering plant	RE5	RE1	On closure of animal rendering plant
River Glass	Rendering plant to source	RE1	RE1	As existing
Baldwin River	Glass confluence to source	RE1	RE1	As existing
Groudle River	Port Groudle to Groudle Glen	RE1	RE1	As existing
Groudle River	Groudle Glen to source	RE2	RE1	End 2002
Baldrine Stream	Garwick Bay to source	RE1	RE1	As existing
Laxey River	Old Laxey to source	RE1	RE1	Set aside Zinc otherwise RE3
Glen Roy River	Laxey confluence to source	RE1	RE1	As existing

River	Stretch	1995-1999 Quality	River Quality Objective	Comments
Cornaa River	Port Cornaa to source	RE1	RE1	As existing
Auldyn Stream	Sulby confluence to source	RE1	RE1	As existing
Fern Glen Stream	Auldyn confluence to source	RE1	RE1	As existing
Garey Stream	Sulby confluence to source	RE2	RE2	As existing
Sulby River	Garey Weir to Ellenbane	RE1	RE1	Set aside Aluminium otherwise RE2
Sulby River	Ellenbane to Claddaghs	RE1	RE1	Set aside Aluminium otherwise RE3
Sulby River	Claddaghs to Ballakerka	RE1	RE1	Set aside Aluminium otherwise RE3
Sulby River	Ballakerka to Block Eary	RE1	RE1	Set aside Aluminium otherwise RE3
Sulby River	Block Eary to Dam	RE1	RE1	Set aside Aluminium otherwise RE4
Ballamenaugh Stream	Sulby confluence to source	RE1	RE1	As existing
